Are you retarded? The host blocks traffic everywhere but Italy to prevent it from being rekt.

How do you expect someone to down it in Italy. lol

How do you expect someone to down it in Italy. lolNope, noob we don't use ACLs during attack, we never use ACLs

See <http://check-host.net/check-report/cfb7dd>

More other countries work too

Pls don't speak if you don't know things

This fucks itself with 40Gbps spoofed UDP, and by "spoofed udp" I mean regular udp with spoofed source.

And I actually used an Italian connection to make sure and I cannot connect to port 80

During the attack the port 80(http server) was perfectly working from italy because my customers and monitor not reported problems

Then you are a liar

Ps: from the check-host report you gived me i am sure you are a liar cause say from italy work

Soon i will give you a link where you can see it by your eyes

We dont block countries"we' stop trying to act like you own a big company, when you're just reselling a host, that every retard uses on garrys mod.

Me and some other guy after we finished attacking it was blocked everywhere but Italy and 2 other places for 5 minutes

Little noob skid i own a registered company

We have more than 30 racks full of server located in 2 different datacenters

I personally think i own a company not big, but medium dimension.

Just asked and checked, in italy never goes down (nothing goes down), all 100% working
