Thread: [Plex Server](#)

drDREAD - February 16, 2016, 5:37 pm

So I have a tone of movies, some are out some not

I'm trying to save a few extra bucks (poor college student alert) and I have this app called plex,

Think of it like Netflix, only its hosted by me and I upload daily movies, shows etc. SO no waiting, and its MUCH cheaper.

All you need to do is contact me and I can set you up, you can enjoy free movies and tv shows

Is this something people are interested in reply in the thread!

Thanks bro's

Lots of people have their own Plex server - and in all honesty it's easier for most people to just stream or torrent anything they want to watch. Can't see there being much of a market for this service if I'm honest mate.

I believe ya, got a couple of friends who don't know how to do that stuff. Otherwise, I know it wont appeal to a lot, thanks for pointing it out broo!

You are trying to earn some extra, but also says:"you can enjoy free movies and tv shows"

How is it free, if you earn money?

I'd like to have access, i know plex.

What I mean by this is some movies that are not out yet, I can provide. As well as newest tv shows. This saves you the time of torrenting.
