Who Are We?

Legends is a diverse group not fixed on a particular agenda. Marketing, programming, hacking, you name it - but only people who make the cut will be accepted. We strive to contribute, teach and learn as individuals. We do not consider prestige or reputation to increase any chances of getting in Legends. We expect high quality members willing to contribute to our group as well as the community - we always welcome such members wholeheartedly.

[img]http://s9.postimg.org/jzubyp2v3/LEGENDS_2_0_DELIMETER.png[/img]

Requirements

We do not have any specific requirements for applying to our group. If you feel you have a chance of entering this group, then you are free to apply.

[img]http://s9.postimg.org/jzubyp2v3/LEGENDS_2_0_DELIMETER.png[/img]

Notification To All Applicants

We do not consider rep, awards, prestige or status to be a deciding factor. You must be willing to be an active member of the group and participate in group activities & contributions. We do not endorse inactivity within the group. Please revise your application before posting it. We expect applicants to be truthful in their applications. Do not contact the leaders or the group owner regarding the status of your application. Applying via userCP instantly gets you into the groups' blacklist. Selected applicants will be interviewed through Skype or any IM service of their choice. Good luck to everyone who intends to apply!

"Five things you would do when accepted into the group" - The "first" five things. Its more like we want to see how enthusiastic you are for entering the group and start acting immediately.

A line or two about you:
Who am I you may well ask
I really wish I knew
If I am not myself at all
Then maybe I am you
To discover who I really am
Is really quite a task
Maybe I am someone else
Who wears a funny mask
I strive so hard to know myself
To discover the "real me"
My thoughts and feelings all confused
Yet still I cannot see
What makes me tick?
What makes me feel?
So very special and unique
My purpose in this glorious world
Is what I truly seek
I wish I could be creative, self confident and smart
Not quiet, shy and insecure
Emotional at heart
I wish I had the confidence to say what I really feel
Instead of fearing criticism
Uttering words that seem unreal
Why at times do I feel so alone
And just yearn for a friendly face
While at others I just long to be
In some far off distant place
With no one else to bother me
And disturb my rambling thoughts,
Until my conscience brings me back
To do the things I ought
And so I continue on my way
On this journey they call life
I try to do the best I can
Though at times the goings tough
I'll do my part to refine the world
And make it a better place
By being "me" to my capacity
With each trial I have to face

A line or two about you: Name's Accora and I am a fairly hard working person IRL and on the computer. I like to think I'm fairly good with optimizing websites for search engines.

List of skills: SEO, I have pictures I can send via PM to prove my worth on that. I am currently ranking a 11 day old domain in the web hosting niche. Which believe it or not is not easy to do.

Are you a developer, marketer or advertiser? If I can only choose one, Advertiser. Especially PPC, I ran an affiliate marketing campaign just through bing ads and with a target on the country that is effected by my niche the most; with a select few keywords and a very nicely worded ad I made a little over \$350 in 3 days. Autopilot.

A line or two about you: I'm 17 years old, been a computer programming enthusiast ever since I was 9 years old however, I'm more into the engineering side of computers. I'm more into social engineering and I have made A LOT of money via SE'ing. I love to play football (or soccer, whatever you want to call it. It's the same thing). I have made quite a lot of friends during my time registered here. I'm easy to talk to and never fail to keep a conversation going! :^]

List of skills:

- Making money

- Socially engineering. More like: making money via socially engineering:

<https://i.imgur.com/xTJdmCr.png> - that's from 'grafting', selling goods for higher. Goods that were

delivered to me but the money was refunded, I then re-sold the goods for a very higher price.
(NOTE: this is 100% pure profit).

Are you a developer, marketer or advertiser?: I can market and advertise. Market as seen above. Advertising, I can do that - my personality is generally positive; I love to accentuate positivity in things. I am also good at talking to and convincing people. I'm an introvert.

Contributions we could expect from you: I can help members financially (I don't mind it, only if it is for a comprehensible cause, however). I'm fairly new so you can expect a mass amount of activity within the group.

Five things you would do for the group once you are accepted: Advertise this group positively. Try and get to know every single person in the usergroup. See if anyone needs help with anything and, if possible - if they'd like me to provide any help. I can offer advice when it comes to marketing, I am experienced with marketing and just being able to help someone whenever they need help in general.

Current products or services: I am not currently hosting any products or services but I am helping Lesley ('CallOfCyandic' / Lesley / SecuroSev) with some C# help. He is a member of HackForums. As you can see by my reputation, I've been helping a lot of people too. Pain, Benny Boy, Glory Boyz, etc.. I am thinking of releasing services on how to monetize your services more effectively and efficiently.
