before i start this, this is for absolute beginners to spreading!

freeNwild's ULTIMATE GUIDE TO YOUTUBE SPREADING

In this FREE Tutorial, I will show you everything needed to get thousands of installs per day absolutely FREE!

Let's Get Started:

Step 1:

Go ahead and download [OBS](#) for the best recording quality possible.

Step 2:

Once you have done, this it is time to think about what your video is going to be about. For Example: In one of my videos, I have chosen to use the popular paid CS:GO cheat known as [Aimware](#) and I posted a video with the "cracked" version of it.

Step 3:

Now that you have decided which program you are going to use, download a REAL version of it from the website. You are going to need to have a stub.exe from your RAT/Bot and a maximum of 5/50 crypter... FUD is always good to attempt. When crypting the program, bind the working program to your stub. If your crypter does not have that capability, find a binder here on HF using the search button. Attach an icon and you are ready to move on to Step 4.

Step 4:

Once you have a FUD .exe that when run will connect to your RAT and also boot the program as to not raise suspicion, we can move on. Now, it's time to make the video demonstration. Open OBS and go to Sources --> Add Monitor Capture. Then, start recording a demonstration of you running the file and getting into the software. NOW, THERE ARE SEVERAL WAYS TO GET INTO THE SOFTWARE, 1. BUYING IT 2. FINDING A REAL CRACKED VERSION 3. CRACKING IT YOURSELF.

Step 5:

Now that you have made the video, upload it to YouTube with a legit looking account with a channel banner and everything. Add necessary tags and then upload file links to the description. For FREE hosting that won't get removed, I recommend using [this](#)

Upload the video and head over to [YTmonster](#) to get free views, subs, comments, etc... I would share my video, but that never ends well...

I HOPE YOU GUYS ENJOYED THIS TUT, IF YOU HAVE ANY QUESTIONS, JUST REPLY BELOW OR PM ME! REMINDER: THIS IS FOR BEGINNERS ONLY!

Good beginner tut but "thousands of installs per day" lets get real here, best youtube methods probably could reach 40 a day max.

honestly, i havent gotten that many, but if you made enough videos, and added a worm to the process, I believe it's possible, but maybe i got a bit excited... but its not like im trying to sell anything xD
