-It basically rips mp3 files from the spotify server then it automatically adds the id3 tags and the album cover art. Blobby

Why not just torrent(buy) the album you want? Spotify quality is pretty terrible. Anyway thanks for the share, I'll take a look!

Are you dumb? Youtube and torrenting is better than spotify quality? LOL

Not sure if trolling, but 320kbps/FLAC/ALAC torrented rips are better than compressed 128kbps/256kbps streams on YouTube and 160kbps streams on Spotify. It's compressed to save bandwidth and storage space. Unsure how it might compare to a 320kbps stream from Spotify, but I would think it would be similar.

Guys do not trust that guy, you need to fill in your credentials of spotify he's probably getting the

Try to use TuneFab Spotify Music Converter for free downloading all your Spotify Music into MP3 file format and rip music from Spotify. It is useful.
