Anyone know any website that give the name for free?

Or can someone give me the name? Willing to pay a few bucks.

There aren't any legit sites that give you a name for free.

If it's not from a cell phone, I can tell you who.

Exactly. It's not 100% free, and it rarely if ever has information on peoples' cell phone numbers. That's why I said, there aren't any legit sites that will do it for free. Even sites that charge a fee always come back with the person not found in our database bs result.
