Hey there everyone! I just wanted to introduce to you my new forum dedicated to modding, but with some other sub forums you can participate in :) I don't plan on this becoming as big as sites like Se7ensins, but I do want to grow a fun community of modders and some gamers.

I have some big plans for this forum, but as of now all I ask is that you signup and give it a look. A custom theme is coming within the next two weeks.

Thank you!

The theme looks very plain, and the logo looks like it took 2 seconds. Fix and then will talk.

Why did your rip the theme?

Thanks.

I didn't rip this theme. I found it online, and used it until I get my custom theme.

I like the name, not gonna lie.

Gaming forums are hard to get into now, and many people still stick to the 7s or TTG scene.
