Thread: [\[TUTORIAL\] UNIX | LINUX Tutorial - the basics](#)

v0dka - February 20, 2016, 10:20 am

Hi everyone

this is my first ever video tutorial im used to doing text and image based tutorials, so bear with me, in this video I cover the basics of a unix/linux based system, how to enter the bios, how to check for devices picked up and i talk about what a kernal and how a kernal loads modules.

anyway feedback would be appreciated:
video link--->

I don't see anything/if any relating to UNIX, but nice start for a Linux user.

#Skyline - February 23, 2016, 2:24 am

Vodka, get this up on Youtube, and advertise your scanner on the video, while doing so.

Advertise your business around your knowledge dude, as I know you have a fuck load of it !

Nice video tutorial also, I want to see more.

thanks skyline ? yeah i got lazy with uploading to youtube camtasia just spit out a set of files which was ready to be uploaded to a webserver(html,swf etc..) so i just uploaded, will convert and put onto youtube!

i will have loads more on the way! dont you worry brother :)
