Can we get more info bout dis

The Swagbucks bot runs all videos in each playlist which was all timed out and calculated and cotains every playlist right now, with videos, in the bot. Basically it goes through each playlist with all certain amount of videos until you get the swagbucks for said playlist. The adfly bot is proxy's that use masked traffic from either google,youtube or tumblr to basically fool adfly.

This still works? I made a 2nd account and recorded macros (tedious hours of effort for me) that would let me earn SB while away from my laptop, but their anti-macro defenses seem to be very thorough.

If this is still working, I'd be interested in maybe purchasing a copy.
