Thread: [\[Bug\] Ward enemyjungle with your wolf \[Useful Exploit\]](#)

Okto - February 20, 2016, 8:03 pm

hi there

there is a pretty funny & useful bug.

you can get vision in enemy jungle with your wolf

all u need to do is make wolf low, run into midlane (way to red)

and then smite him after he stops attacking you and want to reset (the last red little bar under the wolf)

Code i.epvpimg .com/Cclfg.png(smite at the red dot on the minimap)

sry not enough posts to post image.

This has already been posted before, but thanks for sharing anyway

Here's the video about it.

A pro Team lost a ban because of this. So expect it to get patched soon.

JohnyCNAM - February 21, 2016, 8:45 am

It doesn't work anymore, atleast for me.
