Thread: [I need Adobe Fireworks CS6 but can't find it anywhere](#)

BaiN - February 21, 2016, 8:44 am

I tried looking on Creative Cloud but it's not up anymore where can I get this?

NeverHere - February 22, 2016, 8:55 pm

Adobe Fireworks has been discontinued as of May 2013. Adobe Illustrator and Adobe Edge both have the same functions and features so it was phased out.

It's still on their website to download so it doesn't matter.

EDIT-

Thought you said adobe photoshop cs6 (but I think same still applies)

You'll have to find another photoshop cs6 link on youtube or something as they don't provide the download link on the site anymore

I can't remember the one I got recently but if you look through youtube enough you'll find it

I can't remember the one I got recently but if you look through youtube enough you'll find it

You can still find a download for Fireworks CS6 on their site it's just well hidden and you have to navigate from the home page for the link to work properly I think I seen it in a Youtube video.

Anyway I have it now.
