Thread: [\[VPN\] Get Your Own Offshore Private Bulletproof VPN Setup \[Cheap\] \[NO LOGS\]](#)

Deathiant - February 21, 2016, 9:02 am

Here is my Offer:

I will set up a Private bulletproof No Logs VPN on a VPS server in Germany / Netherlands / Russia, Locations known very well for their security. I will charge \$12 for the first month for setup costs as well as a month of VPS rent, and will deliver your VPN fully configured within 24 Hours of your payment. You will then be responsible to pay the monthly rent from then on, which is \$6-8 depending on which country you choose. I accept only BTC. You will receive full root access and SSH access to your VPS, so you will be able to access it and personalize and edit it as you please, and be able to check for yourself the configuration and No Logs kept. Reply here or PM me with your questions, I thought I would do these installations to help HF members out, as it does take some basic Technical Know-how to set this up efficiently and well, and many people might have difficulty with it, and in Exchange, I make a little bit of Money.

PM me for more info.

Not sales trashing in this instance, purely asking questions. What encryption algorithms do you use, and what makes your service better than others available?

I plan on using AES-256-CBC instead of blowfish, and a large 2048 bit key. I believe that my service would be better than others as many of the other services use scripts to automatically create these servers, while I will offer manual setups to ensure everything is working as it is meant to, and will also offer support and will fix any problems which could happen in the future, so customers will have personalized and real time support from me as long as their VPN is running.

RockBeltHostLTD - February 21, 2016, 10:35 am

I cant vouch for this as your unable to install openvpn servers.... You bought my service to do so. Also your not even able to create users for your service.

Deathiant - February 21, 2016, 10:54 am

I bought your service to try it, I currently have two fully functional servers set up on my own. As to my inability to create users for my own thing, it is due to me not having access to the admin panel and control panel as a result of you using a script to create the setup. Also, I am not too sure about this and please correct me if I am wrong, but wouldn't this come under sales trashing?

O t t o - February 21, 2016, 10:56 am

I might be interested but not until you have some Vouches.

Deathiant - February 21, 2016, 10:58 am

I would be happy to provide you with a trial 1 day VPN so you can Vouch for my service, that way we are both satisfied?

PM'ed you about it, we will talk there

Why are you using OpenVPN access server? It's much easier to just do it without, and requires less resources.

Just preference I suppose, But if someone wants normal OPENVPN on their srver, I dont mind

Going to Hand out three Vouch Copies at over at my thread:

<https://hackforums.net/showthread.php?tid=5179923> anybody interested in buying the service let me know so I can provide you with one of the copies, otherwise I will give the copies to three HQ members with High trust and rep, and they will leave feedback on this thread after they try it.

CrossFire1010010100 - February 26, 2016, 12:29 am

There is still ISP logs right ?

Deathiant - February 26, 2016, 2:20 am

(Feb 26, 2016 01:29 AM)CrossFire1010010100 Wrote: [\[CITE\]](#) There is still ISP logs right ? that I cannot speak for, but the company assured me that they themselves keep no logs, and seeing as you can choose a server in Russia or Sweden or Germany where internet protection laws are very strong about privacy, you should be fine, unless you happen to take down a government website or the such. After setup you will have complete SSH access to the server, and be able to do with it as you please.

looking to do a few setups, PM if interested, will provide test/vouch connections so you can be assured of the quality of my service.

Deathiant - February 28, 2016, 9:12 am

looking for more installs, anybody interested PM me doing almost any location on the planet!

Deathiant - March 1, 2016, 7:33 pm

Need some more installs guys, bumping this up. Anyone interested PM me.

Anybody interested PM me bumping this to the top need a few installs guys! I am trying to get started but if nobody is willing how am I gonna do this??

Deathiant - March 4, 2016, 11:33 pm

Anymore interested people PM me or post here!
