Thread: [Non spoofed syn and layer 7](#)

ma?ns - February 21, 2016, 9:26 am

Anyone has a non spoofed syn source coded in C for me? I need it for some stuff and every syn script I find is ssyn. I had one non spoofed syn flooder but the site stopped working and I lost it. Im also looking for a http / slowloris / other layer 7 method coded in c. Thanks in advance

Slowloris: <http://pastebin.com/eHBgtEV0>

Syn Flood(Not sure if it spoofs or not): <http://pastebin.com/uuJ8w4jX>

Kumara - February 21, 2016, 9:39 am

<http://pastebin.com/tnEhuPd8> is a pretty dank L7 script.

ma?ns - February 21, 2016, 9:41 am

Thanks for the scripts :)

bare in mind slowloris only effectively works against apache servers

also for windows usage and tor i suggest pyloris

The syn script spoofs: strcpy(source_ip , "192.168.1.2");

Then again I just noticed it

iph->saddr = inet_addr (source_ip); //Spoof the source ip address

iph->daddr = sin.sin_addr.s_addr; I'll keep looking
