Thread: [Zip Bomb/Zip of Death](#)

FvckingAnime - February 21, 2016, 1:16 pm

Okay first of all hello Guys i am new to this Forum and i hope that i will learn something here! I started using a specific App to "learn" hacking and get a view about it!

So i am stuck at the Zip Bomb!

I already built one etc. but ive got no Idea how to send it! I searched in the Internet and i only found Videos/Threads that show how to build one! But they never told me how i could send it to a Person!

I've heard one of the most important things in Hacking is not being a noob and try doing Things alone. I tried sending it per Skype ;_ ; didnt work out well the person just refused to download it, so ive got like zero options left to send it! I cant think of a Thing to do now, so could you guys tell me a few Options how i could send my Zip Bomb to other People? Its 1 Terrabyte so it should be big enough to crash someones PC after running out of Disk memory!

Please help! ?[/font]

5chn4pp - February 21, 2016, 1:19 pm

What kind of zip bomb? A file or this?

<https://duckduckgo.com/?q=zip+bomb&t=ffab&iax=1&ia=images>

If file, what does it do and how did you make it.

(Sorry to not answer your question, i am just interested)

I know this is off topic but, your profile pic, THE ORDER KNOWS! XD

BeNT- - February 21, 2016, 1:24 pm

Try the spreading subgroup man.

But prolly embed it in a ms doc or something they will want to look at (and open).

Big topic really.. The subgroup will get more specific help than here.

Cheers

Wait, you want to send a 1 tb file over skype to crash a pc ? Yeah Size caught me too.. Although I dunno about it so if it's zipped data that's optimized for lossy compressing I figured maybe haha..

I am dumb :P

B.

Uhm well ive never seen anything like this before in my life, i mean the thing that you can see when you click on the link, is it for fishing?

Yea uhm its a file of compressed Data and if the Person tries to open it, then the system/antivirus will find more and more Gigabyte till the Computer runs out of Disk Memory and crashes.

(Feb 21, 2016 02:43 PM)BeNT- Wrote: [\[CITE\]](#) Yeah Size caught me too.. Although I dunno about it so if it's zipped data that's optimized for lossy compressing I figured maybe haha..

B.

yea its 1 Terrabyte compressed Data, thanks to zip its now only 240kb so i stuffed 1 Terrabyte into 240 Kilobyte with Zip

Sorry dude like i said im new! Like real new i registered here few hours ago!

Whats the subgroup? Is it a Thread Section in this Forum?

Ah so i should change the name to like idk "CS GO Crack 2016" so the chance is higher that the person will download and look at it? Thats pretty smart!

Gosh im dumb as fuck what does, doc and ms mean agan? I mean i remember what you mean but ive forgotten the full name of it!

Niko - February 21, 2016, 6:41 pm

For anyone who doesn't know what this is, picture your computer reading
00000000000000000000000000000000

Thats a little bit of data, but compression systems would basically say 0x24 to change make it more optimal for storage.

With normal data, you would see something more like this

000001111100011100001111
0x5 1x5 0x3 1x3 0x4 1x4

Its not significant compression, but its better than nothing.

Now with a zip bomb, using a very simple thing to compress such as plain 5's would achieve this.

as having trillions to the power of trillions of fives would essentially fill your hard drive, you could compress the information into something as simple as $5^{999999999999}$.

Thats not exactly how things work, but you get the gist of it.

KnittingThreads - February 22, 2016, 10:06 pm

@OP May I ask what your problem is regarding sending it to the victim? The mere sending of 240k should pose no technical problems neither via e-mail, download from file hosting site, over an ICQ-session, etc. So if the problem is not of a technical nature, I must assume you are talking about something else.

Is your question rather this: How will I get my mark to open the file?

goldeneye50 - February 23, 2016, 3:24 am

does anybody know if theres a tut on here about how to make these, im very interested now, i have never heard of one.

Mr. Robot - February 23, 2016, 3:40 am

Try this man :)

<https://www.youtube.com/watch?v=J93OqruUK4o>

Very simple and very effective.

If you want me to upload mine I can.

john12 - February 23, 2016, 4:16 am

Why would you want to do such a stupid, pointless and pathetic thing?

My Victims dont use Email neither ICQ just fucking SKYPE or Facebook how the fuck should i make them download it :/

KnittingThreads - April 24, 2016, 10:10 pm

FB-share a link a page you set up? With metatitle that will show something interesting since FB extracts the metatitle and adds it below (or above) the clickable link? Obviously, you would have to work your way into their FB circle with a fake profile, but if it's worth the time, it's doable.

I assume you wouldn't want them to know it's from you, right? If you don't care, it's a lot easier.

SIDE QUESTION: Does this really work? Never heard of it before. Are you willing to share this file with me so I can try it out?

TrinityUK - April 25, 2016, 9:31 am

1tb into 240kb, Woo lol, Sounds funny if your sending it to your friends, I would do as the guy above me has said and go with the Facebook route.

Hunting Rifle - April 25, 2016, 9:34 am

Just google 42.zip and get someone to extract it.
