Thread: [Anyone Have Success With Flippa, Buying Apps, Websites and Domains?](#)

Natalie Dormerr - February 21, 2016, 2:24 pm

Well I am watching a app for like 66\$ that has 100-500 installs per month, 4.0 out of 5 on the android market ratings, and it might be a steal to get and put some advertising or maybe price it at \$1 in the app store. Has anyone had any success with buying apps, websites and domains online? What I Want to do is eventually get enough apps to where I am making a profit. Only problem is you need to have patients and look for the right ones.

I made the mistake by buying a newer ebook website that had no traffic.

I have thought about doing things like this too, so I hope someone has some advice on this.

I used to flip domains. All I can say is that in some regards, it's a shady industry.
