Thread: [\[ANYONE\] Hackforums.co | Free Email Providing Service | Get your @Hackforums.co now!](#)

Silicon Valley - February 21, 2016, 5:33 pm

So I started up a new service called Hackforums.co

You can basically use this to send mail to your friends. And its just cool to have a @hackforums.co email. Gmail accepts it, yahoo accepts it. Its accepted everywhere. Its not blacklisted anywhere and I don't want it to be. So please do not use this to spam.

Rules:

- Do not use this service to spam.
- There are no limits on space :)

In-reponse to security:

This does not store cookies or use sessions. Therefore the enigma safety crew was wrong. Accounts cannot be compromised. The only XSS vuln there is, is basically you can display a client-side popup. Which would only appear to the user that's forcing the XSS. Therefore in conclusion everyone is safe. Do not worry :)

To get started with your free email

Simply go to

<https://www.hackforums.co>

MeIT3d - February 21, 2016, 6:41 pm

I vouch for this service. Works perfect for me.

1111can - February 21, 2016, 6:43 pm

Vouch for this service, and big vouch for silicon valley really good person to talk to!

?Synapse - February 21, 2016, 6:52 pm

Vouch for this awesome service, managed to cop some OGs :)

Silicon Valley - February 21, 2016, 7:29 pm

Thanks for all the kind words.

NGMA - February 21, 2016, 7:37 pm

What port is needed for POP3 with gmail?

Silicon Valley - February 21, 2016, 7:49 pm

(Feb 21, 2016 08:37 PM)NGMA Wrote: [\[CITE\]](#) What port is needed for POP3 with gmail?
POP3 is port 110. Id recommend IMAP over POP or SMTP

?Astronaut? - February 21, 2016, 7:57 pm

Vouch for this service, Sweet dude great Pug pics.

Wireless Network - February 21, 2016, 10:58 pm

Thanks i'll give it a try soon

SIM-2223238 - February 21, 2016, 11:05 pm

This is not because I don't trust you but do not use your Hackforums password for this.

TheChi?f - February 21, 2016, 11:25 pm

Thanks for this. Gonna give it a shot ?

Cicatrix - February 22, 2016, 12:35 am

This is a great one, cheers cuz

Silicon Valley - February 22, 2016, 7:04 am

(Feb 22, 2016 12:05 AM)Aggron Wrote: [\[CITE\]](#) This is not because I don't trust you but do not use your Hackforums password for this.

The passwords are random generated silly.

kinzokuhebi - February 22, 2016, 7:08 am

thanks a lot op. will use this :)

EgoETEK - February 22, 2016, 8:13 am

Error : ErrBadMailboxName

Silicon Valley - February 22, 2016, 8:33 am

(Feb 22, 2016 09:13 AM)EgoETEK Wrote: [\[CITE\]](#) Error : ErrBadMailboxName

Mail2web is broken I believe. I recommend downloading ThunderBird :)

weapon - February 22, 2016, 8:42 am

Vouch.....i love this guy...became my friend in less than 2 mins of time...u are awesome with awesome service man....cool

BaiN - February 22, 2016, 8:52 am

Sweet man is there a limit to how many you are allowed?

Silicon Valley - February 22, 2016, 8:53 am

(Feb 22, 2016 09:52 AM)ohhmygawdd Wrote: [\[CITE\]](#) Sweet man is there a limit to how many you are allowed?

zero limits whatsoever.

NGMA - February 22, 2016, 8:55 am

I grabbed a few sexy emails, thanks for this OP! ?

Silicon Valley - February 22, 2016, 8:56 am

(Feb 22, 2016 09:55 AM)NGMA Wrote: [\[CITE\]](#) I grabbed a few sexy emails, thanks for this OP! ?

You are allowed to sell them if you would like. People are already selling them lol.

Success - February 22, 2016, 10:54 am

Vouch for this user and his fantastic service. He has a nice doge as well.

ibrathebest - February 22, 2016, 11:12 am

Really good service, thank you, works well Sir :)

Mula B - February 22, 2016, 12:43 pm

Just grabbed mula@hackforums.co.

Awesome service OP.

Silicon Valley - February 22, 2016, 1:11 pm

Update: Captchas have been added to prevent bots from stealing og's.

pp4l - February 22, 2016, 1:15 pm

vouch for this service, it works.

Silicon Valley - February 22, 2016, 1:21 pm

Thanks for the kind words pp4l

Josh? - February 22, 2016, 1:38 pm

Legit. Got josh@hackforums.co

aSmoo - February 22, 2016, 6:26 pm

I wouldn't really allow people using you domain to makes email, you never know how a lot of scammers could use this :(

Sorry to say but yeah.

Silicon Valley - February 22, 2016, 6:30 pm

(Feb 22, 2016 07:26 PM)aSmoo Wrote: [\[CITE\]](#) I wouldn't really allow people using you domain to makes email, you never know how a lot of scammers could use this :(

Sorry to say but yeah.I prevent impersonations :)

aSmoo - February 23, 2016, 4:52 am

(Feb 22, 2016 07:30 PM)Silicon Valley Wrote: [\[CITE\]](#) I prevent impersonations :)

How do you really prevent that? I could make any email I want at the moment, already seen some people grabbing "OGs" and stuff.

Silicon Valley - February 23, 2016, 8:53 am

(Feb 23, 2016 05:52 AM)aSmoo Wrote: [\[CITE\]](#) How do you really prevent that? I could make any email I want at the moment, already seen some people grabbing "OGs" and stuff.

Well first of all I setup a blacklist. People cant register staff names or omni for example. Members can PM me if someone else took their name too.

Niko - February 23, 2016, 3:54 pm

"There are no sessions. There are no cookies."

Kedox - February 23, 2016, 3:56 pm

(Feb 23, 2016 04:54 PM)LegitBytes Wrote: [\[CITE\]](#) May want to fix that XSS Vuln.

#EnigmaSafteyCrew

We told him about his code being vulnerable. But his excuse was he doesn't care lmao

Hopsin - February 23, 2016, 3:58 pm

(Feb 23, 2016 04:56 PM)Kedox Wrote: [\[CITE\]](#) We told him about his code being vulnerable. But his excuse was he doesn't care lmao

So, do you mean the website or the email(s) can be compromised ?

Niko - February 23, 2016, 4:01 pm

(Feb 23, 2016 04:58 PM)Hopsin Wrote: [\[CITE\]](#) So, do you mean the website or the email(s) can be compromised ?

All you would have to do is send someone using this service a exploit and steal their cookies which then you would be able login to the account

Silicon Valley - February 23, 2016, 5:21 pm

(Feb 23, 2016 05:04 PM)Kedox Wrote: [\[CITE\]](#) All you would have to do is send someone using this service a exploit and steal their cookies which then you would be able login to the account

Can you tell me whats the issue? All you can do is make xss display a pop up. I get that. Can you do actually serious damage through? Accounts cannot be compromised through what you showed because login is done externally. The only thing you can do is just display a pop up that you and only you can see.

(Feb 23, 2016 05:04 PM)Kedox Wrote: [\[CITE\]](#) All you would have to do is send someone using this service a exploit and steal their cookies which then you would be able login to the accountThere are no cookies stored silly goose.

(Feb 23, 2016 04:54 PM)LegitBytes Wrote: [\[CITE\]](#) May want to fix that XSS Vuln.

#EnigmaSafteyCrew

The only vuln is you can display a pop-up client side. There are no sessions and no cookies.

Anyways thanks for helping out guys. But there are no account-side issues haha

Kedox - February 24, 2016, 5:28 am

Ah, I didn't even enter your website I was on my phone.. I was going under the assumption you made your own email panel and didn't run it in the background.

Also, the vuln isn't a popup, the vuln is that we can force javascript to run on whoever reads the raw output. The popup is something that we use to prove it.

Silicon Valley - February 24, 2016, 1:51 pm
