Are you using online outlook? Thats for microsoft emails only. There is an outlook app you can download and basically change settings there. How are you connecting SMTP or IMAP or POP?

yeah they are lol. register jerrysmith@hackforums.co before someone else does and tries to sell it to you. these will always be free but if an email is taken is taken. You can try offering the owner of the email some money for it I guess. But the service is free. You can get any email you want and you do what you want with it. Sell it keep it idc. As long as the email isn't already taken by someone else.
