Girl Goes Psycho During Makeup Tutorial

If you think it's real you're retarded. Sorry folks

Nahi - February 22, 2016, 3:40 pm

Im sorry man but she is an actor. This isnt real.Listen to the sound.

It's someone beating on a garbage can. Instead of the sound that plastic of a laptop or keyboard makes when you smash it.

The cut on her forehead, notice the lump (you do not knot up that fast, blood has to clot (or fever build) so the lump is fake, blood pack).... she had to tilt head back to hide flaw in blood pack.

There is a buzz sound to make you think the microphone in the laptop is damaged when it actually wouldn't sound like that in a laptop. That is more like an amplifier having an input cable removed, the buzz sound you hear is when a hand grabs the chord and grounds it.

This a stunt by a low quality make up artist, trying to get noticed

This psycho video was created to promote something called "The 15 Experience". Some guy is making a web series.
