I have an RGH, picked it up a few months back for the nostalgia - Those were the times

I saw this pop up and for a second got hit with a wave of nostalgia thinking "No way people still RGH consoles?? Holy hell"

Was worth a shot for asking lol. Did they ever figure out any sort of console modding for the Xbox One?

I always get a nice kick of nostalgia from threads/posts about modding from the old days as well. Flashed 360s, Devkits, Jtags, RGHS, etc. I have a lot of good memories with them all.
