Thread: [Convert video to GIF as avatar](#)

Jeep™ - February 23, 2016, 11:07 am

Does any body know how to make a HD video into an avatar that would be the size for hf?

I tried myself but didn't really succeed, I want this video to loop perfectly (particles making one full loop around the Jeep logo) as my avatar here on hf, and I want the black area to be transparent.

Video:

Spoiler [\(Click to View\)](#)[Video: <https://www.youtube.com/watch?v=vnnFe4GLYuM>]

Will reward the person who can help me with this.

I don't think its possible to turn it into a GIF without keeping the background that color.

It would also take a long ass time to make this a GIF since you would have to take pictures of every single frame.

Blade - February 23, 2016, 11:11 am

I will try to do this for you OP. I will keep you updated if I have any news.

So what if I made the background to the exact color of HF's gray background, could that work?

And it's not that big of a deal to me if it doesn't loop perfectly, just as long as it loops.
