Thread: [How To Find Out Peoples Insecurities \[Easy Prey\]\[NON EWHORE METHOD\]](#)

Smack Tricks - July 3, 2010, 12:36 am

First of all this will most likely be known by all of the expert social engineers out there so this is more tailored to the beginner looking to find easy prey to practice on. I'll use a conversation I had with a girl to explain what I did and what I was looking to get out of it. Ill go through it question by question. :D People like the one below are ideal to exploit because they will be insecure about themselves and also lonely. Knowing their insecurity gives you power over them. For instance, if someone is fat or was fat at some point, you can almost always assume that they see themselves as undesirable. These are the people that get no dates and sit at home on a Saturday night eating cookies while chatting online. There is also a good chance they own at least one cat. These people will rarely reject someone and are very submittable to flirting and advances. Basically if you make them feel good about themselves they will want to reward you. There is a different way to go about handling each insecurity and a different way of exploiting them. I'll just show you how to find it out below.

My comments will be displayed in the puke orange color

Quite an interesting way to gain trust.

i2x - July 3, 2010, 3:10 am

Interesting but they are all presumptions, apart from the location etc.

Show No Mercy - July 3, 2010, 3:59 am

This tut is very interesting and I find it a good way to gain someone's trust. I like the most of it that it isn't e-whoring. Keep up with the good tuts because I'm learning and training my SEing skills on strangers and random ppl on chatboxes (no pedo's although i tried e-whoring 1 time).

Casual Jr - October 10, 2010, 7:13 am

Very well set out with the colours used thanks for the tips and informations you have provided :)

Sage Mode - October 11, 2010, 10:38 am

This is a rather interesting SE. I like how you were constantly gathering data on your target.

404NameNotFound - January 5, 2011, 9:06 am

I liek the way you think, people should be more focused on smaller implications like that when gaining trust..
