Basic Questions

What is your preferred name? I go by Drizzy.

Who is your favorite artist? My all time favorite would have to be Drake. He is my favorite person in the industry at the moment, and has his fans on a puppet string.

Are you active and willing to listen to criticism? I have just begun my returned activity on HackForums. I believe entry into this group will give me an option to become more active and a chance to discuss and share my ideas about music. I am open for criticism of all sorts and I am always giving my opinion about something.

Tell me about yourself and what you love. I am a 24 year old male living in Los Angeles, CA. I have lived here for a few years now and I have had many different interactions with many different artists of all types. I would say that I love computers, and I consider it to be my passion. As this is a music sector within a group, I will describe my love of music. Hip-Hop has been in my life for as long as I can remember. I have been following various artists since a very long time ago. I grew up listening to 50 Cent, Eminem and mostly Tupac. My love of hip-hop grew and persuaded me to try and find some career in this field. I have managed many different artists. For fun, I have also sang hooks, and produced a few songs. Sadly, I do not have any portfolio work as I did this mostly for fun. I also enjoy marketing, web designing, and shoe collecting. I have been collecting shoes for a few years now and I love the idea of it.

Field Questions

Please answer only the field questions you signed up for.

Music Producer

Which DAW are you most familiar with and what is your experience with production? I am most familiar with Logic Pro. I have some experience with Fruit Loops and Garageband. I have produced for fun but haven't done it in a long time.

Please provide a small portfolio of recent or past work. N/A for reasons stated above.

Are you willing to collaborate with other artists within Riptide? Yes, I am willing to share my knowledge as well as possibly gaining knowledge from other group members.

Are you willing to assist other members of this group? Yes of course.

Listener/Record Reviewer

What is your preferred genre and what is your experience with reviewing/understanding music? My preferred genre is Hip-Hop/Rap. I always listen deeply to lyrics within a song. I try and find the meanings myself, otherwise I resort to websites like RapGenius. I was almost about to make a YouTube page dedicated to reviewing albums/songs such as BIGQUINT. I also enjoy analyzing the beat and I sometimes enjoy songs by some specific producers just because of the beat.

Please provide a small review on a song of your choice from whatever genre.

At the time of writing this post, I am listening to Monster by Future, and I will review a song from this mixtape.

Future - Throw Away
Spoiler ([Click to View](#))

Produced by Nard & B this song is one of my favorite on the mixtape. It shows Future's R&B side, and if you are familiar with Future this isn't usually the case. This mixtape, written after his breakup with pop-star Ciara, really shows his true feeling toward life and women. Throw Away describes the lack of emotion Future feels when he is with many different women. The beginning of the song starts off with Future talking about his experience with women and how much he is having in all the clubs. The emotion slowly starts to get deeper. When the beat changes (great production here by Nard & B), Future begins to declare his feelings for Ciara is what I personally believe. He is admitting that his side chicks have ruined his relationships but that he still hopes that his "one true love" is still thinking about him. After that, he is basically saying that he doesn't care about Ciara anymore, but he wants her to think about him.

"Mark my words ima ball without you
I came home last night to a ménage
Got my dick sucked I was thinking about you
I was fucking on a slut and I was thinking about you
When you're fucking another nigga hope you're thinking about me
When you laying with that nigga are you thinking about me"

In all, I had to keep this review short, but this is a great song. Even though some people don't understand Future when he sings/raps, there is still much meaning. If you actually listen to the lyrics and the production, you can see that there is more to it than just bitch, shit, fuck and nigga.

Have you ever reviewed music in publication? Not professionally. I have kept a blog from before, long before, and I wasn't into it. I generally like to review music in person.

Are you willing to review artists within Riptide? Yes, of course! This is one of the main reasons I would like to join the group. I would enjoy hearing your opinions on some of my work, and I would love to review your guys' work.

Are you willing to assist other members of this group with your feedback? Yes. I will not only provide constructive criticism but I will provide my true opinion of the groups work in a mature way. The only way to get better is to practice, and read my reviews ;).

Thank you for the opportunity to apply. This seems like a great group with meaning, and I would love to be a part of it.

Basic Questions

What is your preferred name? Soulmate but I go by a lot of other names

Who is your favorite artist? Baauer

Are you active and willing to listen to criticism? Yes I'm always ready to accept criticism especially when working in the art and business fields.

Tell me about yourself and what you love. I'm originally from Russia but I moved to America when I was around 10 and a few months ago I moved to Canada which is where I'll be living for the new few years so I have tons of diversity in music culture. I love technology and music mostly, I'm studying Business Technology Management at university and 100% of my free time goes into doing stuff musically related. I'm not really a producer but I know the scene pretty well and I have a little bit of experience in FL. Right now I really love listening to rap and the new wave of trap which is very experimental and cool. Sometimes I like chill stuff but usually I stick to hard hitting beats and instrumentals.

Field Questions

Please answer only the field questions you signed up for.

Listener/Record Reviewer

What is your preferred genre and what is your experience with reviewing/understanding music? My preferred genres are rap and bass, mostly future bass and trap. I've been using reddit quite a lot to expose myself to new music and while I don't really have MUSIC reviewing experience, I used to review a lot of movies and TV shows. -> [click](#) as you can see most of the reviews for the old official HF group Infamous were done by me as I led the review team.

Please provide a small review on a song of your choice from whatever genre.

[Keith Ape - IT G MA Remix \(josh pan Opus\) w/ sakuraburst, MISOGI, X&G, MEDASIN., oshi](#)

Ever since Keith Ape has had his newfound fame in North America, there have been many variations and remixes of his hit "IT G MA". If you have not heard the original and the remix it is highly advised as the energy and instrumentals are breathtaking. A short while after the song released, some American rappers decided to hop on it as well which was the second phase for the song, with A\$AP Ferg, Father, Dumbfoundead & Waka Flocka Flame spitting bars in place of the original Korean and Japanese rappers that brought the song into phase. Now however, with the new Opus by Josh Pan the song is brought into phase 3 with a 14 minute remake featuring all new instrumentals from the current best experimental bass artists and a new verse from Anderson Paak, the producer for Dr. Dre's Compton

Since over 10 artists worked on this over 14 minute long "song", it might feel like it would be clunky or unorganized but it is just the opposite. Think of being in college and writing a group paper, with all the strong sides coming out of all the individual writers then the executive writer putting it all together into a masterpiece that deserves much more than an A+.

Have you ever reviewed music in publication? No

Are you willing to review artists within Riptide? Yes, that is actually what I was hoping to have to do

Are you willing to assist other members of this group with your feedback? Definitely

Basic Questions

What is your preferred name? Obi

Who is your favorite artist? Well that's a toughie. A few: Rolling Stones, Grateful Dead, Led Zeppelin, Pink Floyd, Sinatra, Violent Femmes, The Dear Hunter, and it goes on...

Are you active and willing to listen to criticism? Yes and of course. I love hearing feedback on my work.

Tell me about yourself and what you love. I am a 21 year old man who loves to play music, sing, and write, among many other things.

Field Questions

Singer/Rapper

Which DAW are you most familiar with and what is your experience with singing/rapping? Fruity Loops (hardly). I have been singing for four years and have played at small venues.

Have you ever taken vocal classes? Nope.

Are you willing to collaborate with other artists within Riptide? Awe hell yes.

Are you willing to assist other members of this group? Absofuckinglutely.

Lyricist/Songwriter

Which DAW are you most familiar with (if any) and what is your experience with writing? Again, barely Fruity Loops. I've been a writer for five or six years and have written many songs, of which 7-10 are Obi approved, while the rest have been retired.

Please provide a small portfolio of recent or past work.
Refer to porfolio above (only one is a cover, and I have more of course).

Have you ever taken creative writing classes? In high school, and I was always at the top of my class in english, reading, and writing.

Are you willing to collaborate with other artists within Riptide? Mhmmm.

Are you willing to assist other members of this group? Yessir.

Listener/Record Reviewer

What is your preferred genre and what is your experience with reviewing/understanding music? I prefer classic rock, and mostly everything from the 1900's honestly (80's hair bany are my least fav prob). I've been a musician for six years and understand a good bit of it.

Please provide a small review on a song of your choice from whatever genre. N/A (I'm on a phone; I can do this if needed).

Have you ever reviewed music in publication?
Nah, but I've reviewed music for local musicians before.

Are you willing to review artists within Riptide? Willing and able.

Are you willing to assist other members of this group with your feedback? Fo sho tho.

Basic Questions

What is your preferred name? Well I mean my real name is Conrad but I mean you can call me whatever. Some of my close friends even occasionally call me faggot. My artist name is Metro, though.

Who is your favorite artist? I'm going to have to go with Varien. His style is incredibly unique, the vocalists in his songs are also always on point. He's sort of my idol I guess.

Are you active and willing to listen to criticism? Oh yeah. Be as harsh as you can.

Tell me about yourself and what you love. I live in Canada, I occasionally play video games casually, of course I also enjoy making music. My stuff may not be fantastic by any means, especially most of it is drone/dark ambient, but that doesn't really matter. It's just fun to make something and being able to call it yours is a good feeling.

Music Producer

Which DAW are you most familiar with and what is your experience with production? Well for producing, I primarily use FL studio. Take note I've got a launchpad pro, so I do a fair bit of performing too, so for times like that I use Ableton. My favourite VSTs are Serum, Massive, Absynth and Battery.

Please provide a small portfolio of recent or past work. Well why don't you just waltz on over to my soundcloud? Take note I have more tracks which I just didn't upload yet. Anyways, <https://soundcloud.com/metro5>

Are you willing to collaborate with other artists within Riptide? Yeah, I've got some experience making stuff with other people too, so I know my way around.

Are you willing to assist other members of this group? Always. I have a pretty good understanding of FL studio and I can tell you almost everything about Ableton, from keyboard shortcuts to doing almost anything. I also know how to use google :D

Anyway, even if I don't get in, thanks for reading this!

Basic Questions

What is your preferred name? Scar is fine, don't matter.

Who is your favorite artist? It's a tie between Paul McCartney and John Lennon. Both are great singers with amazing song writing abilities and vocals.

Are you active and willing to listen to criticism? Yes of course.

Tell me about yourself and what you love. For starters I am very passionate about music. I've grown

into it since a kid. I remember going over to my uncle's house and hear him and his band play on weeknights. I've always like to see and learn from other musicians. Of course this naturally led me to start listening to music from various artist. I've found each one of their different styles of song writing, their musical techniques, the way the use their voice to bring out life to certain lyrics. This in turn led me to become a musician myself. I play guitar and drums. I've tried singing but it just isn't something that I could ever do. For the most part I am very unbiased about music genres. I'm always willing to give new things a try and give my honest opinions.

Field Questions

Please answer only the field questions you signed up for.

Listener/Record Reviewer

What is your preferred genre and what is your experience with reviewing/understanding music? My favorite genre has to be rock. From The Beatles, Chuck Berry, Van Halen, etc... As far as experience reviewing and understanding music is that I have taken several music classes so I'm very aware at the structure of a song. The way I approach a song is by first listening to the song as a whole. Afterwards I try to pay attention to individual parts of a song, instruments, or vocals. I then put all my acquired knowledge together as one. From there I just give my opinion reviewing each aspect of the song.

Please provide a small review on a song of your choice from whatever genre.

The song I am going to review for you now is the song Band On The Run by Paul McCartney and Wings on their album of the same name.

First and foremost what I like the most about the song is the transition of the song from a mellow to an upbeat rhythm. It makes you feel as you are listening to two different songs.

The song is very much a ballad about freedom and the band's cunning escape. It is interesting to find that McCartney was inspired by the many problems The Beatles faced with their company "Apple".

The song itself holds a deeper meaning that I would like to get into but would make this review pretty lengthily.

The first of the three parts of the song kicks off with a nice and mellow beat that is supposed to set the listener in the mood that the singer is in. A mood of depression and grief but with a tiny amount of hope. It does a great job conveying that feeling out to the listener.

The second of the three parts beings with a slightly faster tempo and a tad bit more aggressive guitar and lyrics. It lays out their thoughts of what-if they were to break out from their prison. It also serves to build suspense towards the third section of the song.

The last part brings out a more quicker beat to the song. It starts off with a wonderful acoustic guitar playing rather basic chords that convey perfectly the adrenaline that the singer/narrator is feeling as they break out from their prison.

In conclusion this song is a great example of McCartney's impressive songwriting abilities. It is a unique song that is like no other in terms of song structure, use of onomatopoeia in some of the lyrics he sings and the arrangement of instruments in bring out certain emotions in order to better

convey the song's lyrics.

Have you ever reviewed music in publication? No I have not, I usually share my opinions with like-minded friends at college.

Are you willing to review artists within Riptide? Absolutely! I'm eager to do so. It is always fun listening to new talent ?

Are you willing to assist other members of this group with your feedback? Of course, I'm more than willing to share my musical knowledge with anyone.

What is your preferred genre and what is your experience with reviewing/understanding music? I prefer Rap. I started loving rap at a very young age and I continue to love it today. I enjoy listening closely to the beat/instrumental of the song.

Please provide a small review on a song of your choice from whatever genre. Eminem's first song. Infinite was amazing. Although the beat was not the best quality and it was all over in intensity the

song still had a meaning behind it. And that's what matters most in old-school rap.

Overall one of my favorite bands. I liked their older stuff better,it seems that there sound is moving towards something along the lines of slipknot. Who is your favorite artist? Group - Queen

Are you active and willing to listen to criticism? Always/ As a cellist, I must always be able to take criticism or I would never be able to improve.

Tell me about yourself and what you love.

I am currently in a few orchestras and I've been a cellist for 6 years. I've signed up for the singer/rapper application due to there not being a instrument/musician application but I feel that this would best fit it. I've played the cello since I was a child and I don't think I could ever get bored of it. There's always new things to learn and always things that I have to improve on. Funny the reasoning I wanted to play an instrument was because I hate singing. But all musicians can relate that if we don't practice enough, we can quickly lose what we learned and have to start from the beginning.

Field Questions

Singer/Rapper

Which DAW are you most familiar with and what is your experience with singing/rapping? None. I've never had to change the way I sound.

Please provide a small portfolio of recent or past work.

Its actually kind of an odd question to ask for string players as most of us never record ourselves endless we're trying to find errors that we can't detect while playing or during a concert.

Have you ever taken vocal classes? I have taken tons of private lessons since I was a kid and currently still do.

Are you willing to collaborate with other artists within Riptide? I am definitely willing to collaborate but I feel like there's no other string players in Riptide or who would wanna collab with a cello. haha....

Are you willing to assist other members of this group? In a music theory aspect, of course I would. I believe that music is a universal language and I think I could more than likely help singers (Not sure about rappers cause "I'm not a rapper" lol.) as well.

Music Producer X

Basic Questions

What is your preferred name?

I prefer to be called Lokii. Though I've got another artist name which is my full name.

Who is your favorite artist?

In my opinion, people who love music don't have favorite artists. One day I like Martin Garrix's music, the other day I love Linkin Park. These genres are both completely different, but if I had to chose between a Linkin Park concert or a Martin Garrix set, I couldn't make a choice.

Are you active and willing to listen to criticism?

Yes I definitely will be very active. I'm still learning about music and I know from my experiences that criticism really does improve your work.

Tell me about yourself and what you love.

Well I'm Lokii. I'm a DJ but also a music producer. Although I love a lot of different genres, I produce EDM. I'm a huge fan of Martin Garrix, but as mentioned before there are a lot of other artists with different styles of music I would love to see live. I used to play the Trumpet, but I had to quit due to school. That's when producing music came in. It's something I love to do when I have some spare time left.

Field Questions

Music Producer

Which DAW are you most familiar with and what is your experience with production?

I can't exactly remember when I started with music, but I started producing in Magix Music Maker. I don't know a lot about it anymore, but I know it was the most shittiest program I've ever worked with. About 5 years ago I started using FL Studio. First I combined it with Magix Music Maker, but soon I used it on it's own as it's way more extended than Music Maker. Now a days I still use FL Studio but I'm still discovering new features every day.

Please provide a small portfolio of recent or past work.

Just put some unfinished music together:

Of course this is far from finished and I don't know IF I'm gonna finish it, but these are the best projects I'm working on atm.

Are you willing to collaborate with other artists within Riptide?

I'd love to. Collaborating is something I'd love to do, but unfortunately I never did it before.

Are you willing to assist other members of this group?

Helping people is something I can't resist. Someone I always want to help people, whatever their problem is. So yes, if any member needs my help, I'll be here for them.

I'll review A\$AP Rocky's Song called "Holy Ghost" form his latest album A.L.L.A.

This song hits close to home since I am Christian and I understand his Pov and where he is coming from become I share the same Pov as him. The church now a days is fairly corrupt and people are straying away from what Christianity was meant. The pastors and the staff of the church are robbing the people of God and uses that money for their own personal gain rather than for the church. There are tons of Christians who say they are Christian but you know what they say "Practice what you Preach" many christian now a days or hypocrites and think they are safe by doing things of the world but since they are "Christians" they are automatically pardoned from damnation. A\$AP Rocky

acknowledges he isn't the best Chrisitan but at least he is real with himself and doesn't claim this false holyness.
