Thread: [==>BECOME A SOCIAL FUCKING GOD<= \(FREE VERSION\)](#)

**Prophet Banana** - February 26, 2016, 3:23 pm

You've probably seen my many threads of banging co-workers, moms, lesbian swingers, and everything in between. I've read my fair share of books regarding pick-up and attracting females. I've offered much to the PUA community and have received many "thanks" in return.

The number one key to picking up any woman is something all HackForum users poses. And if HackForum users were to embrace this trait they poses, and use it to their benefit, I assure you women will have Niagra Falls seeping through their panties just at the mere sight of you. No matter how pimply and rashy your bottom is from sitting on your leather computer chair, gaming all day.

So now I bring you the key to attracting any woman, and that is by being a social retard. You might think I'm kidding but women want what they can't have. By you acting like a social retard, women will assume you're not paying attention to them and therefore they must get your attention.

It's simple, you just bert stare them whenever they try to talk to you.
