Thread: [\\ ADSENSE EXPLOIT /// vpn, clicks, cpc, ip !?!](#)

calamassi86 - February 27, 2016, 5:17 am

we have a network of niche websites....

high CPC niches.

we have adsense accounts.

We have been testing several traffic sources and providers but most of them out there are junk !!!

I've been thinking about setting up some EXPLOIT system with VPN, browsing simulation, cache and cookies, different IPs from premium countries etc etc

Sometimes our clicks generate 1,2,3 or more dollars...

I know Google is the smartest guy out there but I think we could be smarter and navigate under the radar....

If someone SKILLED with hacking, vpn, cpc, adsense wanna Joins or at least partecipate.....!!!!?

Bull™ - February 27, 2016, 5:19 am

Do you really think that Goolge are team of Idiots ?

Ooze - February 27, 2016, 5:19 am

Not sure I completely understand what you are doing.

You want to partner with someone

Or is this a tutorial

calamassi86 - February 27, 2016, 6:08 am

partner with someone who has some skills in this

Hopsin - February 27, 2016, 8:08 am

am sure Google will let him earn some money and after a while before cashout, ban/suspend him for breaking ToS because they will investigate in my opinion. Which means, its pointless OP

I know they're experts but still you can cover your tracks and be safe if you used your brain.

There's a local saying in my country that say "the robber can defeat the guard". if you know what i mean ?

Not if you were careful with what you're doing, keep it real and use your brain and you will make easy money from The Mafia "Google".

calamassi86 - February 27, 2016, 2:31 pm

i know guys who made 5 figures/month for many years.....using several adsense accounts

its doable, its just a matter of skills and tools

and its doable, of course, if you high CPC.....and I have it

Goyllo - February 28, 2016, 12:25 am

It is possible, since they are robots not human, and they did not care about who earn 10\$ per account, because I have reported many of fake website who are using clickjacking script, but still they are live, look's like they take action only, if someone earn huge money in one adsense account.

I have seen some guys, who made accounts with different name, bank account holders name. different laptop and different local ISP, so it's look different no matter how much they will trace you(No matter which type of cookies they will install in your computer, it's impossible to trace).

Now, you need to careful about clicks, since they have powerful tools to prevent fraud clicks, for example, if you see 5 clicks in one account, then after one or two hour, you will see it's deduct to 3 clicks only. 2 clicks are consider as fraud clicks, because user did not take any action on advertiser landing page. So you should clicks like you're real user.

Don't think clicks from different IP's will be fine, because may be you're using same computer with mac address.

Don't use VPS or RDP kind of tools, they are pretty smart to detect.

Just ask your friends to click on your ads, again do not join Facebook groups who offer clicks exchange, because chrome and adsense cookies already watching it.

calamassi86 - March 11, 2016, 7:22 am

or is anybody able to build a script capable of simulating human clicks ?

NoMercy - March 11, 2016, 7:25 am

This part of your post is equally as stupid as your idea. The google team already have systems in place to stop this.

calamassi86 - March 11, 2016, 7:41 am

im sorry for you, first because of your rudeness, second cause you are wrong

ThePsycho - March 13, 2016, 9:24 am

Google is link God of Internet , whatever u could think of exploiting them , there must be 10000+ more like u who Google must have made suck their balls.

free_jacker - January 1, 2017, 4:34 pm

you just need a good coded browser that is able to reset whenever you need and not get traced, to generate traffic with it and stimulate user interactions in your website.

If you are a coder , just search on google and you will find alot of them coded in different languages.

Siwel - January 1, 2017, 5:11 pm
