Thread: [Scammed by Razor \\$500 - UID 123825 - Owner of Payco.re -](#)

#Skyline - February 27, 2016, 6:43 pm

6 months Razor.... You let me down, you let Beslim down with \$1,000 also.

Profile Link: <https://hackforums.net/member.php?action=profile&uid=1243825>

Razor's Skype Name: xr4z0r23

Other scam report for \$1,000 USD: <https://hackforums.net/showthread.php?tid=5157451>

So what happened ?

Wednesday, 16th September, 2015, 12:47 PM AEST GMT 10+

I paid Razor to code me a crypter for \$500 6 months ago. Which was going to be my new project SkyProtector. We talked on Teamspeak and Skype about it. I then went ahead and verified this deal via HF PM.

Spoiler [\(Click to View\)](#)

This deal started after I PMed him.

He then replied verifying this deal, and included his BTC address, so I can pay him.

Spoiler [\(Click to View\)](#)

Sent \$208 to Razor. (Remember this was 6 months ago, BTC value has changed since then)

<https://blockchain.info/tx-index/2a922cb4579b2b8df1e2ad861de744a93fbd137bf29fbc5b1ec76cfb6fe237d0>

I paid \$208 of the \$500 for the full product, meaning I have \$292 left to pay Razor when he completes my crypter.

From September, till December, Razor was AFK, or doing something else with his online time. Honestly, it didn't even feel like he gave a shit about the \$500 I sent him to code my crypter...

Monday, 30th November, 2015, 08:17 PM AEST GMT +10, I sent Razor a PM, asking what is happening with my Crypter, as I have not heard anything from him, and to check if he is ok, due to Killa getting in trouble from reFUD.me.

Spoiler ([Click to View](#))

Wednesday, 9th December, 2015, 08:31 AM AEST GMT +10

I sent Razor yet another PM asking where is my crypter ? He replied with the same excuse as last time basically....

Spoiler ([Click to View](#))

Thursday, 10th December, 2015, 8:52 AM AEST GMT +10 Razor messages me on Skype telling me the crypter is finished. He wanted to be paid the reminding amount for the crypter.

I sent him the remainder \$292 via BTC.

That means I've sent razor the full \$500

Now what is the problem I am facing with Razor ?

He delivered a broken product. The crypter is coded in C# (The builder) and AutoIT (the stub) . The stub does not execute on Windows 7 operating systems, due to DEP (Data Execution Prevention)

Every time I run a stub on Windows 7, I get this error.

Razor has known about this for 2 months now, we've been speaking in Teamspeak about it, and also speaking about running a VPN together when he was running the group DARK (Which he still needs to pay Beslim \$1k for).

And yet he hasn't done a single thing to fix it. He's only told me to turn DEP off from my Windows 7 system. But on Windows 7, DEP is on by default, meaning on any other Windows 7, theirs a 95% it will not execute, due to DEP.

Wednesday, 10th February, 2016, 10:24 AM

After DARK was taken back into hands of Beslim, because Razor did not pay for the group on time, I messaged Razor asking what is happening, and asked for a partial refund of \$250, or fix the crypter. He replied saying he'll be back to fix this.

Spoiler ([Click to View](#))

I sent Razor another PM. He failed to reply, so I have made this scam report, hoping that the community is aware of this, and that he knows he won't get away with this either.

You have been ignoring me, and I'm over waiting. This has taken over 6 months now, and I have no idea what the hell you're doing. I am stupid for even dealing with you.

I'm not taking this scam report down. I'm even being nice to you Razor, asking for \$250 back in BTC, that's a 50% refund.

I sent you my BTC address via PM. And I'll resend it, along with a link to this thread so you can bitch your excuses like you did in Beslims, then just walk out, buy a sticky for your crypter, and act like this never happened. When it did...

GreyHatZone - February 27, 2016, 6:49 pm

Damn bro, its getting alot harder to trust people now, even if they have high rep.

I don't know much about crypters or you guys, but why are you only asking for a 50% refund? That way you literally lost 250\$ and 6 months.

Patience is key to success.

Example: I know for a fact if I start calling out razor, flaming him, harassing him, calling him a stupid fucking cunt because I'm mad at him, he'll get all defensive and use it for a reason not to pay me, like Beslims situation. So he'd use anything as a reason not to handle this dispute.

I handle this professionally, if Razor cannot, that proves his just a 20 year old child.

?mad?us - February 27, 2016, 7:53 pm

well didnt expect this from razor quite frankly

PurpleIsAColor - February 27, 2016, 7:57 pm

But PayCo.re is so good.. RAZOR PLEASE.

DaFreak - February 28, 2016, 12:06 am

lol i recall u telling me ages ago that you were working on a crypter project and well you got scammed by razor. I don't know what he's been upto lately with this kind of nasty shit.

w?????illiam????? - February 28, 2016, 12:07 am

Damn another report against to him . @ Skyline you have some solid proof here sorry for your loss bud :(

(Feb 28, 2016 02:25 AM)beslim Wrote: [\[CITE\]](#) Yep just like mine a valid scam report that you should instantly put in the DB, this guy has been online 24/7 on skype and hackforums and is both ignoring to pay us thinking that he can get away with it. I'll tell you exactly why he stalls, it's because he is waiting to find a reason not to pay us.

oh and FYI this is a funny fact everyone should know, Razor met me in real life and also Skyline. (apparently he does not give a fuck to screw people over that he knows, shameless guy.)
He hasn't seen this scam report yet, so I might wait until he does. No response, or has some shitty reason, I'll add the DB.

I really can't believe it's came to this.

#Skyline - February 28, 2016, 4:43 am

(Feb 28, 2016 04:21 AM)beslim Wrote: [\[CITE\]](#) You waited 6 months to open this report on him, and he never even bothered help you. So better realize and believe that this is exactly what's suppose to happen.

He's a person that uses others for his own benefit, and the first mistake he made is he used the wrong people cause sooner or later he is going to regret this big time.

His livelihood is depended on hackforums and his products so it's not at his best interest to start scamming and using other people. I'm a patient person, so I'm gonna see what is going to happen when he sees this thread, and views my PM. Then I'll go ahead and put this up on the DB.

And it seems like his best interest has been that lately, and I have no idea why, nor give a shit about his personal issues he uses as reasons. His had long enough.

?mad?us - February 28, 2016, 5:34 am

And why do you think one would care about getting added to the deal db thingy?

Zotima - February 28, 2016, 5:51 am

Damn ! thats a huge amount

I mean, if one has a deal dispute thread already why would one care about getting added to the DDDDB. And as far as I can tell you were the one to tempt your faith about the deal dispute system to lose your 2k rep. So please stop responding so salty.

Stick to the topic smartypants.

This will be my last response to you as you seem too salty to respond in a reasonable way.

Quote: Omniscient (402)

Negative (-9): You just lost almost 2000 rep. How dare you tell me I allow someone to scam. You are insulting.

That kind of looks like someone had a few deal disputes and you complained to omni about him. But alright, GLWS and I hope you get your 1k back from razor.

god damn, sorry for the loss skyline.

it be unfortunate if something permantly happend to payco.re...

Kioshima - February 28, 2016, 8:19 am

Razors reputation went down fast, actually 6 fucking months.

Varane - February 28, 2016, 8:23 am

It was a good idea on my part to stick to Payivy.

#Skyline - February 28, 2016, 2:36 pm

Giving this 4 hours then adding to DB, his had long enough, 6 months even.

All members please deal with caution with Razor until this is resolved. Wouldn't even suggest dealing with him overall.

#Skyline - February 28, 2016, 7:41 pm

Hopefully Razor was telling the truth, and I hope you get this situated. Good luck man, I know you're a really good person, sucks to have this happen to you!

#Skyline - March 1, 2016, 3:15 pm

He comes online and has no intentions of replying or fixing this, or reading my PM I sent him. And has viewed these threads I believe, judging from screenshots of him viewing other reports on him.

Partial refund is more than fair in this case. I can't believe Razor is still not paying him.

Since he has the intentions of cleaning all this mess up, his working with me to resolve this. Gave him a choice of the partial refund, or make the stub work.

If Razor makes this work, I'll be happy, as I still have intentions for this project.

But for now this isn't resolved until Razor sends me a new stub for the project. Which I was told I'd receive in 5 hours (9 hours ago)...

Bumping this because this "friend" has yet to pay.

I could. But Razor said he'll fix this. Yet he hasn't.

So guess it comes down to a \$250 refund as I'm getting tired of this situation.

This report is still open, so of course it hasn't.
Nor believe I'll get a refund or hear from Razor again, so it will remain open.
