Thread: [Teaching oriented object programming on Skype](#)

ONUR0UX - February 28, 2016, 5:11 pm

Hi people,

I am about to make a quick about Java oriented object concept on skype using Eclipse.

We are going to learn the basic concepts (public/private attributs, methods and objects).

This lessons is going to be for those who already have a basic understanding of java programming (you have to know about conditions,loops,arrays,functions and be familiar with Ecplise).

Comment or PM me your skype usernames.

Lesson starts Friday 4 March at 20:00 ?

+Haze - February 28, 2016, 10:48 pm

can i join the fun too? im new to coding

Cynderstryke - February 28, 2016, 10:57 pm

Is this free? If so I would love to join

MrOrang - February 29, 2016, 4:57 am

I am probably not home on friday but if I am I would like to see this. I am still very new.

Cant wait to learn about private and public

Also what timezone?

keram007 - February 29, 2016, 6:59 am

could you help me with when to use Final/Static ?

matt - February 29, 2016, 11:29 am

I'm new as well, can you teach me how to use the protected modifier?

ONUR0UX - February 29, 2016, 5:13 pm

It's free of course :)

Everyone can join but I strongly recommend to know the basics of programming because it's a bit hard to follow if you don't have a starter pack. You can learn the basics in the website of [thenewboston.com](#) .

Looka it will be a pleasure for me to teach you another day if you are busy on friday

Keram final is used for constants and static is used to make/call functions in the main code. I will make exemples to clarify your understanding.

Midnight I can do a fast exemple of protected modifier

JIM NASIUM'S GYMNASIUM - February 29, 2016, 9:23 pm

0NUR0UX - March 1, 2016, 6:08 pm

Here is a good introduction

hackforums.net/showthread.php?tid=66160

And you will also need to watch this video until 12:30 about functions
youtube.com/watch?v=eBodvWUy2NQ

If you have more time, watch this too about arrays

youtube.com/watch?v=L06uGnF4IpY

youtube.com/watch?v=nTF-RcgsV0E

youtube.com/watch?v=ctab5xPv-Vk

Friday 4th March 20:00 UTC-05:00

Xpect - March 2, 2016, 1:18 pm

damn, i would love to join but friday nights im a bit busy, are you going to record your teachings? if you still going on at 23:00 ill be free (which i highly doubt) i can join then. Skype: zackys

Stealth™ - March 2, 2016, 2:07 pm

Will you be teaching about optionals and predicates?

0NUR0UX - March 2, 2016, 7:44 pm

Not on the lesson of friday but I am thinking of making another lesson about polymorphism, inheritance, super class, optionals and predicates soon before jumping into interfaces.

I will maybe be on until 23:00 too . Pm me if you are on. :)

Haxor104 - March 2, 2016, 7:54 pm

This is only for java? or will you teach other languages as Im busy learning node.js, I come from a heavy python background so I know what classes are and what not

Sugawara - March 3, 2016, 11:07 am

I would love to join this !

I'll just PM you my skype !!

Kedox - March 3, 2016, 11:43 am

It's in the Java section dickhead

0NUR0UX - March 3, 2016, 4:47 pm

It's only Java but I can link you up for a nice node.js tutorial

thenewboston.com/videos.php?cat=355

Have fun

The lesson will start at 20:00.

My Skype is: DenOnDuz
