Cheers bud, Ah not of age? haha. I only play slots in casinos irl and I play blackjack on betonline and use william hill to bet on sports now, that's all I do to do with betting, Currently at 14k in earnings so far, not bad.

EDIT: Oh and PokerStars for poker, but I don't play that much :P

Na man I'm smart with it, I have never lost earnings on betting, I'm always up, Sure you may lose here and there but I always win it back and so much more.

I cannot go to a casino, I lose enough at the tracks to even test my luck in a casino. I used to spend basically \$300 on a roll of \$1 lotto tickets.

I tend to risk a lot on BTC gambling, trying to wing myself off of it. I'm so bad at gambling, even when I 10x my money, I always go flat broke. ?

That sucks to hear man...

I only went to the casino for the 25\$ food voucher. I live a few minutes away, so I would go with a buddy and spend 5\$ and have fun for 2 hours on penny slots and then get dinner and a pizza for later.

Can't win if you don't play tho, I always have fun during, which is key really.

Yeah that's what it's all about man, the fun matters. But just don't beat yourself up over losing, always bet something that won't really matter if you lose, I see way to many people gamble with money they should be paying something off with. But people like to see it as "If I put 200 dollars in and win I can pay off that 2k car loan I owe to the bank" but then lose the 200... lol

Never risk what you aren't able to lose.
