Krave - February 29, 2016, 5:29 am

The Order

What the mind can conceive, it can achieve.

Owner: [Krave](#)

Leaders: [Narrate](#) - [Regulus](#)

This is the first recruitment for The Order. This first recruitment stage has 2 different sectors: General & Gambling.

The group adapts to the needs of each & every user. We also have a slight focus on gambling, but this isn't our main focus.

As we have 2 extra subforums, one of them is a Gambling subforum.

Requirements:

Be sensible and not post spam throughout the forums.

Have a good understanding of HF rules.

Be friendly. Flaming & arguments wont be tolerated. Debates are fine.

No scam reports/negative reputation.

Been a member for at least 2 months.

General Application:

Group Terms:

You must post in 72-hour Activity Check threads. These will be posted randomly so you must be active.

You must make at least 5 posts a week, and 2 threads a month to show activity.

I have the right to deny any applicant.

Me and my leaders have the right to kick you anytime.

You must respect all members.

Recruitment has ended early. If you was waiting for a later date to apply, you have between now and March 13th to PM me your application.

Narrate - February 29, 2016, 5:30 am

Best of luck to any future applicants.

King Cin - February 29, 2016, 5:31 am

What do you understand about HF's gambling rule?: Not sure I understand the question? But I would say not gamble on site and keep it off site and you are allowed to discuss gambling and post about it on HF.

Do you agree to the group terms listed below?: Yes, I have read and agree to all terms, that is not a problem.

Tell me about your history on HF: Started on HF in January of 2014, Came to learn about hacking as you do... Learnt a fair bit about alot of things and stayed and now pretty much am here for the community and the people on site, its a really chilled out forum to be on and I love everyone on it.

What have you contributed to the community? (Link threads/posts): Mainly [this](#) but I am always nice to everyone and offer help where ever. Helping people out is my #1 that makes me happy, I strive everyday to be positive towards people.

How often do you gamble?: Everyday pretty much!

What type of gambling do you do? What platforms?: I play poker machines in real life casinos, Online blackjack, Online poker, And I bet on sports.

Are you currently in profit?: 14k in profit at the moment, not bad.

Big wins you've had (Provide screenshots/links): [This](#) was just yesterday, I have been starting to post alot about gambling recently so this group would be an awesome fit for me.

Wirt - February 29, 2016, 5:45 am

Best of luck to everyone applying to such a wonderful group.

SIM-888979 - February 29, 2016, 5:46 am

Good luck everyone. May the best get in!

What do you understand about HF's gambling rule?: From what I read in the rules discussion of gambling on hf is allowed, though onsite gambling or stuff like that is disallowed.

Do you agree to the group terms listed below?: I do however if a member will be disactive for a while a gives himself a self ban is he still allowed in the group as long as he PM's the owners before hand?

Tell me about your history on HF: I joined back in the beginning of 2015 however I had been lurking before that. I originally joined for "hacking" but am now here for the people to talk about stuff mainly lounging and sports which is why I'm into betting.

What have you contributed to the community? (Link threads/posts): Some small tuts, banter and discussions.

Username: Ben

Do you agree to the group terms listed below?: Of course

Tell me about your history on HF: Been a member of HackForums for over 4 years now. My activity has been on and off at times but I'm generally around.

I'm not well known nor have I done anything special that would make me stand out. Just an active member who contributes daily and always willing to help those that deserve it.

What have you contributed to the community? (Link threads/posts):

Have only done one small giveaway during my time -

<https://hackforums.net/showthread.php?tid=5147965>

Other than that the majority of my contributions are helping members mostly via PM's

No doubt I have a few quality posts around by with 3,250 posts, it might take a while to find them

What can you bring to The Order which others cannot? There isn't really anything that I have that nobody else does but what I can bring is a positive, friendly attitude. Easy to get on with and hard working.

I'm not afraid to say what's on my mind.

What are your skill sets? Over the years I have tried various methods to make money, some more successful than others. CPA, Affiliate marketing, Social Media, PPC, PPV.

About to start learning C#, just need to find the time to get started.

Goodluck everyone, group is extremely friendly ?

Mr. Robot - February 29, 2016, 5:55 am

Good luck to this group - If I put in an application, it wouldn't be a gamble :P

Anyways, glad the leader is someone who can understand the rules and encourage gambling in a positive manner, without making addicts out of people.

I do think you should create a single group referral link for all the sites, so when your users go to gamble, they can use the referral for all losses, which you as the group leader can gamble at the end of each month for example and share back among your group.

DontQQSoMuch - February 29, 2016, 5:56 am

Do you agree to the group terms listed below?:Yes as long as a case is given for when a user has a self ban for vacation or something along that line.

Tell me about your history on HF:I joined in the beginning of 2015 but had been lurking before then. To be completely honest I was never the most consistent poster but then again I never had a reason or group to keep coming back. But still I would always come back every now and then because this forum is amazing and addicting. Its so much more than just "hacking" which I love.

I agree wholeheartedly

Tell me about your history on HF:

I first signed up to "be a hacker", then I realized it wasn't exactly what I was cut out for so I kind of took a brief hiatus working on other internet projects. I moved and eventually came back to HF, not for hacking this time, but for helping people with a never ending problem, SEO!

What have you contributed to the community? (Link threads/posts):

Most recently though a \$10 BTC giveaway (done now) :

<https://hackforums.net/showthread.php?tid=5185232>

What can you bring to The Order which others cannot?

SEO is my strong suit and I am fairly good when it comes to making a sales pitch so selling things is not a problem for me either. I am willing to host giveaways/contents in the name of the group frequently and do something on the lines of a help desk for SEO/Marketing issues.

What are your skill sets?

Search Engine Optimization and Sales/Marketing campaigns.

Thank you for the opportunity!

The Order: Michael's application

Username: Michael

Do you agree to the group terms listed below?: Yes, I do.

Tell me about your history on HF:

I joined HackForums on June in 2011. (This year will be my 5th anniversary on HackForums). I found the forum through a friend that wanted me to join it because he was explaining me the purpose of RAT's and Botnets.

Since then I figured my way out and after 7 months, I applied for Ub3r and was accepted, once the new year (2012) started. HackForums also taught me on how to make some money through PPD. With the money I earned by following guides on HackForums (roughly 60\$), I bought Ub3r.

After this period I kept being active and applied to some groups, including Studio, Eminemce and others.

Now I've been a 4 years + member and still daily active on HackForums.

What have you contributed to the community? (Link threads/posts):

From recent contributions to older contributions.

[FREE 5 custom YouTube comments](#)

[FREE 100 Twitter Retweets or Favorites](#)

[Michael's 15k Twitter followers contest](#)

[HF Harlem Shake \[Video\] ?](#)

[MyBB helpdesk](#)

What can you bring to The Order which others cannot?

First of all, I can contribute to the group by wearing the userbar. My second contribution will be activity, with this I mean staying active in the sub-forum and posting tutorials/ opening a helpdesk in the name of the group.

What are your skill sets?

My current skills include: Social & communication skills: I'm a very good talker and I'm not shy to speak up to a crowd of people or speak to people on Skype all over the world)

Money making skills: I'm very good at creating sites related to PPD/ CPA and create a matching video with it

Extra:

Although I'm applying for the general recruitment, I also like to gamble every now and then. I mostly gamble on sports like football and basketball.

Dutch, English, German.

Do you agree to the group terms listed below?:

Yes i do.

Tell me about your history on HF:

I joined in 2013, wanted to know everything about hacking.

I was a skid at that time, thought i knew alot and acted that way.

But through the years i have become who i am, i learned ALOT on this forum, and i have made some decent cash from HF's methods to.

I gained and shared knowledge, and i am always looking to expand that, so HF will always have a place in my heart.

What can you bring to The Order which others cannot?

I feel like i can bring alot of my knowledge and experience into The Order, i will help everyone as much as i can, and provide the ones in need with knowledge.

I can also hit the ones in need of graphics up with graphics.

What are your skill sets?

Graphics design.

I am working with photoshop for about 3 years now, i know my way around it.

Hand drawn (Tattoo's.)

I have been drawing tattoo's for over 3 years now, but i have been drawing random peices/stuff all

my life.

A little bit of website development.

I do know some website development, i can do simple things and i know how to make/edit a website.

Marketing.

I have made some money from HF and other places, i also used to be owner of Cashforum.org wich was a forum dedicated to moneymaking and moneymaking techniques.

Gambling.

I have been gambling for a good amount of time, both online and offline, offline i enjoy Blackjack and slots the most, online i prefer Bustabit.

Psychology.

This is probably not a skill that you guys think has anything to do with this but i just wanted to add it to the application because i think it will help out alot sometimes.

Tell us a little bit about yourself:

I am 21, but i have seen the world so to speak.

I know my way around life and life knows it way around me,

i have had many dissapointments in life wich made me the person i am today,

i am on my way to success and i am growing in life even more,

i can have really in depth conversations, if you want shoot me a PM.

I am a team player, always looking to expand my net of people.

I work hard and i do not like half finished work, when i begin something i end it.

I am open to ideas and i always listen to what others say, and i will always help them or talk with them about anything.

I have dealt with alot of shit in life on a young age so i know that life is a bitch, hence why i added the skill psychology.

I learnt about psychology because i wanted to understand life, understand people, understand the way people act or think.

I hope that i can get the oppertunity to proof myself.

Trust and loyalty is everything, i litteraly got both words tattoo'd because you won't get anywhere without them.

Thank you for your time to review my application, and i wish everyone who's applying goodluck ?

Gambling application:

(Note i left some questions out, as these are asnwered above.)

What do you understand about HF's gambling rule?:

I understand the full rule, what is allowed and what is not allowed, what to be and not to be discussed.

How often do you gamble?:

I gamble almost everyday.

What type of gambling do you do? What platforms?:

I gamble on Bustabit.

I do play some slots on my phone, Texas Hold'em and BlackJack, but my main focus of making money from gambling lies at Bustabit.

Are you currently in profit?:

Yes i am currently in profit, over 1 BTC to be precise.

Big wins you've had (Provide screenshots/links):

You can see how everytime i deposit money i cash out with profit.

I again want to thank you for taking time to read my application, i really feel like my application is strong, and i hope you do to.

Sorry if the dividers are not placed as best, i had to delete 2 of them because i was not allowed to post 17 images, 15 is the max.

Sincerely,

Saint.

What can you bring to The Order which others cannot?

I feel like i can bring alot of my knowledge and experience into The Order, i will help everyone as much as i can, and provide the ones in need with knowledge.

I can also hit the ones in need of graphics up with graphics.

What are your skill sets?

Graphics design.

I am working with photoshop for about 3 years now, i know my way around it.

Hand drawn (Tattoo's.)

I have been drawing tattoo's for over 3 years now, but i have been drawing random peices/stuff all my life.

A little bit of website development.

I do know some website development, i can do simple things and i know how to make/edit a website.

Marketing.

I have made some money from HF and other places, i also used to be owner of Cashforum.org wich was a forum dedicated to moneymaking and moneymaking techniques.

Gambling.

I have been gambling for a good amount of time, both online and offline, offline i enjoy Blackjack and slots the most, online i prefer Bustabit.

Psychology.

This is probably not a skill that you guys think has anything to do with this but i just wanted to add it to the application because i think it will help out alot sometimes.

Tell us a little bit about yourself:

I am 21, but i have seen the world so to speak.

I know my way around life and life knows it way around me,

i have had many dissapointments in life wich made me the person i am today,

i am on my way to success and i am growing in life even more,

i can have really in depth conversations, if you want shoot me a PM.

I am a team player, always looking to expand my net of people.

I work hard and i do not like half finished work, when i begin something i end it.

I am open to ideas and i always listen to what others say, and i will always help them or talk with them about anything.

I have dealt with alot of shit in life on a young age so i know that life is a bitch, hence why i added the skill psychology.

I learnt about psychology because i wanted to understand life, understand people, understand the way people act or think.

I hope that i can get the oppertunity to proof myself.

Trust and loyalty is everything, i litteraly got both words tattoo'd because you won't get anywhere without them.

Thank you for your time to review my application, and i wish everyone who's applying goodluck ?

Gambling application:

(Note i left some questions out, as these are asnwered above.)

What do you understand about HF's gambling rule?:

I understand the full rule, what is allowed and what is not allowed, what to be and not to be discussed.

How often do you gamble?:

I gamble almost everyday.

What type of gambling do you do? What platforms?:

I gamble on Bustabit.

I do play some slots on my phone, Texas Hold'em and BlackJack, but my main focus of making money from gambling lies at Bustabit.

Are you currently in profit?:

Yes i am currently in profit, over 1 BTC to be precise.

Big wins you've had (Provide screenshots/links):

You can see how everytime i deposit money i cash out with profit.

I again want to thank you for taking time to read my application, i really feel like my application is strong, and i hope you do to.

Sorry if the dividers are not placed as best, i had to delete 2 of them because i was not allowed to post 17 images, 15 is the max.

Sincerely,

Saint.

Opened an account back in January 2015 I scarcely used it, I felt intimidated by the huge numbers and felt rather small. I started getting back into Social Media and picked up the pace in December. I made a few friends and strive to make a name for myself.

I plan to do a huge giveaway soon, but I'll have to find a way that gets me large funds. Social media doesn't cut it anymore and I have to think outside the box.

What can you bring to The Order which others cannot? I can't particularly say anything here as I do not know the other members of the group. I am a friendly guy who makes jokes here and there and usually ends up being a therapist for everyone. I'm the type to talk things out with people when they're not in the right place of mind. I give advice when its needed.

Tell me about your history on HF: I started on HF to learn how to hack and then leave after that. However I stayed, and started exploring the forum. I started being active in the gaming section, I played a lot of Clash of Clans and Battlefield 3 at the time. After a long break of HF, I started trying to monetize. I started trying PPC, dropshipping, gambling, and a lot more. Now, almost a year later, I have set up multiple small projects on HF, and outside HF.

I have a lot of spare time, and I am willing to put it in this group. I can be very creative, and will use that for the group. Probably start some projects I have in mind for a while now in name of the group. If I'm doing well I will make sure I share with the members of the group, and of course do some giveaways.

What are your skill sets?

- I can monetize online and offline

I sell products online, here on HF, but also outside the forum. I monetize offline by selling interesting products I come across to friends and contacts. From clothing to interesting "toys".

- Gaming

I have been playing on my Playstation 3 for more as 3 years now, mostly playing BF3, Call of Duty, Assassins Creed and some other games. I also play some games on my phone or iPad. And don't think gaming can't be used to monetize, it can for sure!

- Social skills

I am very good with most people, I don't get angry that fast. If I argue with someone, I can understand their side very easily.

Absolutely, they seem very reasonable. Actually some of the most relaxed terms I have seen as far as groups go.

Tell me about your history on HF:

I like some have found HackForums through a friend, he showed me the site one day right before a record earthquake in my state. I wasn't very active at first and just kind lurked. Soon after I became quite active after finding the Batch, Shell, Dos, and Command Line Interpreters section. That would be the section I would call home for a while, until I found the VIP section and started posting in the lounges there, I made quite a few friends there before they were shutdown. I was later invited into Void, and that was my first group, next I would be accepted into The Empire. That was where I stayed until mid 2014, I left HF. I didn't think I would come back, and I didn't for about 6 months, I am now starting to become more active again though.

What have you contributed to the community? (Link threads/posts):

I can't say I have contributed a whole lot, mostly just member upgrades either in the form of contests or just people I think deserve it. I have upgraded a total of 5 to l33t and 12 to Ub3r. I want to be one of those people with The Sticky Man award for an amazing tutorial, however I have been having issues writing them. I think that will change though with my latest one, but I digress.

What can you bring to The Order which others cannot?

Class, I can bring class.

What are your skill sets?

What can you bring to The Order which others cannot?

I can bring my full commitment and dedication to this group.

This will also mean I will always be there when someone needs help or they have a question to ask in which I will be able to reply with my expanded knowledge on certain categories.

While posting around the forums I will make sure my posts are high quality because I will be representing the Userbar of The Order.

What are your skill sets?

Social media: I've been using Social Media for years and from the years i've spent on social media I've become very knowledgeable in it.

HTML/CSS: I've self taught myself HTML and CSS which has been useful when making websites or helping out others with their websites. I'm always happy to help other people out with their queries.

Gambling: I've been gambling for a very long time and as much as I'd like to stop, I seem to get lucky when gambling so I end up doing it more and more.

Marketing: I've always enjoyed buying and selling since I was a little kid. I've sold all sorts in my life from Sweets to Social media accounts and I'm always looking for new things to buy and sell.

What do you understand about HF's gambling rule?:

That HackForums is not a place to gamble in any way but the discussion of gambling is allowed.

How often do you gamble?:

Pretty much every day, Yes I have a problem ;(

What type of gambling do you do? What platforms?:

Mainly Bustabit and Satoshi mines but I've also done Blackjack and poker in the past.

Are you currently in profit?:

Yes, Overall in the past month I've made \$700+

Big wins you've had (Provide screenshots/links):

I have two bustabit accounts which i've made 1.5 BTC from:

I can give more proof with screenshots of my BTC wallet transactions.

What can you bring to The Order which others cannot?

I know the line and I don't cross it. I don't beat around the bush, and believe I am a highly valuable asset when it comes to any group. I have no idea of the skill set that other members will be bringing to you, but I always put myself in the other guys position before making a decision and that's something nearly unmatched these days.

What are your skill sets?

My skill sets are as followed;

Highly reputable communication skills (Both verbal and written),

Graphic Work,

Video Editing,

Analytical Skills (In both market research and math based analysis)

I am highly technically literate,
I am flexible and can adapt to your needs.

What can you bring to The Order which others cannot?

As a member of this group I believe I can bring an aspect of dedication that most other members would not, I am online for a fair amount of time every day and always eager to help with group projects and to help members within the group with whatever I can with the knowledge I have. I feel like I would be able to represent the group well and would love to help the group contribute to the community.

What are your skill sets?

-Social Media Marketing

I have been involved with this for some time now and greatly enjoy it, I will also be having a marketing internship through my school this coming summer.

-eWhoring

I've been involved with eWhoring for about a year now and would consider myself an expert in the field, most of my contribution threads pertain to this section.

-Java coding

I am an aspiring computer science major and have begun to reinvest time into coding/programming. I'm not active in the coding section on HF but have taken classes through school and online.

-Doxing

I don't know if this is a skill the group would find useful but I've been experienced with doxing for quite some time now and have developed adequate skills for it.

-Good communication skills

I pride myself in being able to express myself well and being able to carry a conversation with others whatever the topic may be.

-Work well with others

I think I'm a good team player and typically put others before myself and always work my hardest to get projects done on time and complete them well.

I'd like to thank the leaders for taking time to read my application and best of luck to everyone else that applies.

When i first joined, i didn't really see the point of forums, honestly i just saw it as a place to get things made by other members. But after i joined i was soon proved wrong with all of the great things HF has to offer.

What have you contributed to the community? (Link threads/posts): From my time on here, i would say that i have contributed a fair amount, not anything worth noting but enough to know that i am not greedy or anything like that.

What can you bring to The Order which others cannot? I can bring some personal experience to The Order. For example, my gmod server. Even though i have not been doing it for that long i now have a good understanding of gmod lua so if anyone needs any help with that or putting things into game like maybe a gambling system ;). Or maybe GFX, i do quite a bit of that and I run into issues that I end up fixing sooner or later all the time. I would be able to share my solutions with the community and so on and so fourth.

What are your skill sets? As far as my skills go, I have a bit of them.

GFX: I have been doing GFX for quite awhile now. I am far from the best but I no doubt know a thing or two about it and would be happy to help anybody that needs help with it.

Video editing: I have done a lot of video editing. I wouldn't call myself an expert but i can safely say I am pretty good at it.

Gmod server development: Now this is something that most people won't care about but i just thought I would put this out there. I have experience as a gmod server developer (just started about a half a year ago)

Music: I am pretty big on music. Well, instruments if you will. Don't get me wrong, i am a huge music listener too but anyway, I love playing musical instruments. I currently play Acoustic guitar, electric guitar, electric bass, and the drums. I am currently learning to play piano also.

Since then I've quit the game, although I've played many other games between 2012 and now such as CS:GO (1 year), Hearthstone (Almost 2 years) and League of Legends (3+ years). In case you were adding up the year values, I did play more than one game at a time of course :P

What have you contributed to the community? (Link threads/posts): In the past I have hosted many giveaways and contests:

Additionally, after learning how to code Minecraft Cracked/Hacked Clients from users and resources here on HF, I decided to give back by coding a nice, simple client to share with the HF community: <https://hackforums.net/showthread.php?tid=2748091>

However, since then I have been contributing to the forum more through discussions with my experience in Gaming rather than physical giveaways, although I do plan to host more giveaways in the future!

What can you bring to The Order which others cannot? I believe my most useful and redeeming quality for The Order would be my experience on both HF and in Gaming, as I mentioned earlier. I was a frequent member of the Minecraft (Griefing) forum between 2012-2014, so I'd be happy to discuss anything Minecraft-related or anything related to HF between 2012 and now. Furthermore, I currently play more popular games such as CS:GO, League of Legends and Hearthstone, all of

which I'm very passionate about and would love to discuss and compete with other HF members from The Order or beyond!

What are your skill sets? I'm currently studying IT in high school and plan to continue this in University through a Bachelor of Computer Science. So as you can guess, I love anything related to computers, IT etc. and would be more than happy to discuss the topic or help out others users in the area. Moreover, I do have basic programming experience (HTML, PHP, CSS, Java etc.) as well as experience in cracking accounts and of course Gaming :P

Thanks so much for this opportunity and good luck to all other applicants!

Personally nothing has caught my eye yet, keep the applications coming, and make sure to spend enough time on your application.

Five word answers and applications without a good looking format/layout makes me throw up.

I also noticed that alot of you think this is a gamers orientated group, well it's not.

I came to Hackforums being 14 years old, and I only joined in an attempt to make money. Upon joining and realizing it was a gold mine, I decided to stay. I stayed because I loved the community and all those in it. I stayed because I joined several groups that I became such a big part of (143). My experience at Hackforums has been defined by the reputation that I have built for myself, for doing hundreds upon hundreds of deals. Not only that, but the niceness I show towards those in the community as well. Four years of 100% legit deals, and minimal negative rep is down thing to be proud of.

Tell me about your history on HF:

How I came to HF:

Well i was just looking for some FB hacks to hack someones account that I didn't like since he was setting me up all the time and he is just a fucking asshole. I blocked him but somehow he comes back and he actually made a site about me and showed it to pretty much everyone and all my friends and my friends started to ignore me or be really fucking mean to me so I looked on HF and pretty much found nothing and then i started to post a little bit in the lounge and started to love it and started to be more and more active and posting more and more.

How I post and what sections i have been posting in.

I usually post about 100 to 250 posts a day depending on my mood back in the day when I was really, really active but now.. I just chill and just go with the flow actually. I know that someone will catch up to me very.. Very.. soon but I don't care anymore. I usually post in the movies, Music, Gamer Lounge, Xbox, Computer &

Online Games, CoD sections. I am not sure why I love posting so much, I guess it makes me feel really really happy to post alot and it doesn't bore me in any way possible. Before you know it, I got 10,000 posts in under a month and 50,000 posts in a years time and there is no sign of me slowing down or stopping so i am afraid that you are stuck with me. <3

What do you understand about HF's gambling rule?: I can't think of any visible statements on HF but I assume it would be to keep gambling off site and not peer to peer.

Do you agree to the group terms listed below?:Yes.

Tell me about your history on HF: I joined in 2012 for minecraft cheats. Over the course of hf I bounced from many interests, minecraft, csgo, ewhoreing, malware, CPA and many other topics. Now I'm here for the social aspects of HF. I love talking to members, having fun and messong around. I can also take part in serious intelectual discussions. I host alot of join.me sessions for my gambling, we have a fun time playing, im also working on setting up to be able to livestream blackjack on twitch.tv.

How often do you gamble?: I try to keep it once a day max. I found that I was testing my luck a bit too much when I was going in 7 times a day. I love gambling but I also want to maintain a profit.

What type of gambling do you do? What platforms?: CS:GO jackpot sites, Satoshi Mines, Live dealer blackjack, and dice.

Are you currently in profit?: yes, well over \$900 that I keep track of.

Big wins you've had (Provide screenshots/links):Not in one sitting, however this was my best day playing dice. <https://hackforums.net/showthread.php?tid=5136326>

Managed to get \$400 from \$30.

Do you agree to the group terms listed below?: Yes I do.

Tell me about your history on HF: I initially joined hackforums to get hacked clients from the minecraft section (cringy right?) but as I looked through everything, it was a total mess, if you said something against the big "ubers" they'll neg you to death to the point where you pretty much leave hackforums. After witnessing it, I made some original guides (literally 1st week on hackfourms) so that people would like me. Weirdly enough and to my surprise (cause I've seen this happen to other people but they don't get much of a reaction) people were actually encouraging me to keep doing what I am doing and their were messages like "Keep doing what you're doing, you're going to go great places.". I gained a lot of rep alone within a week from the guides. I was so pumped, I just got l33t the 4th day I joined without any issues. I continued trying and have neutral opinions on threads and gave away tons of things. After getting tired of it, I became a lurker and just read stuff in the market place. I started becoming more active when I started helping people in the jailbreaking section and just very slowly becoming active again. Moved on to the market place, started buying tons of programs (I think I've spent over a thousand dollars on just useless products alone.) and I started getting new friends that I have learned so much from their field. I joined Fusion and right now, I think I'm having the best time I have ever had on hackforums and I hope I can make even more memories in The Order.

I believe I have contributed so much more by always answering people's questions when they are in need of assistance in various sections.

What can you bring to The Order which others cannot?

I am extremely well rounded in most topics around HF and I enjoy talking to new people in small groups. I would like to possible host tournaments or contests within "The Order" for CSGO and maybe even League of Legends.

What are your skill sets?

- Extensive Knowledge in OS X and Jailbreaking.

I've been on HackForums since October of 2015. Since that time and I have made a good name for myself in the eWhoring section. Fiz and myself currently offer a affordable mentoring service for fellow member to get into the business and start earning insane amounts of money. I have a Skype group with 50+ members including only HF members and it is a strict eWhoring chat to provide assistance and service to other members. I've done a ton of giveaway on HF and I have plenty more to come. I would much rather help others then myself, which kinda bites me in the ass sometimes, but most of them it's a good thing.

I can bring an enjoyable inviting experience to new members looking to learn new skills. I am extremely motivated and active on HF, I will try my best to help people with anything that is needed. I am talkative and have very good grammar, I plan on getting very active in the White Hat helping section soon because I know a lot about virus removal.

What are your skill sets?

eWhoring

I have been eWhoring since Sept. and have gotten to a mentor level of skills.

GFX Design

I've been studying Photoshop in school for the last 2.5 years and I also have a design certification from Adobe.

[ACA \(Adobe Certified Associate\)](#)

General Coding

I have general knowledge of HTML, CSS, Java & JS.

Rating & Keylogging

I have never infected anymore before however, I have a ton of knowledge regarding these topics.

White Hat - Virus Removal

This goes hand-in-hand with the skill above. To be good at removing virus's you need to understand how they work.

Poker

I am a VERY patient person, which helps when it comes to me playing poker, I plan on doing PokerStars live events soon.

Yes, I agree.

Tell me about your history on HF:

I joined Hack Forums less than 2 years ago. However, I've made great contributions in my time here and have helped numerous members in multiple settings. I contribute to the eWhoring section quite regularly, offer insight, as a psychology major, into the SRPP section, and give advice to members in the Innuendo section as well. I also write for Hack Forums' Weekly. I started off being the most helpful member that I could possibly be. Just two months after my join date, I created one of the most ingenious eWhoring tutorials in the section that is still viewed to this day. I started with the ideology that I should be as helpful to the community as possible and I continue with the same ideology ~2 years later.

What have you contributed to the community? (Link threads/posts):

[\[TUT\] Gay eWhoring](#): Innovative tutorial that I made just two months after joining the forum. It was the first of its kind. People have tried to emulate it, but I am the first one to contribute the idea to the community.

[Buffy's eWhore Picture Packs \(M+F\)](#): One of the most successful picture pack threads on the eWhore board. It also features male packs which is nearly unheard of on the board.

On top of those threads -- I am always actively helping the members of Hack Forums' eWhoring community. I give tips and advice to most posters in the section!

I contribute greatly to the SRPP section. I am a psychology major and offer insight to the best of my

abilities. I do my best to make the section full of ideas and discussion.

I am part of the HFNT as well. I have been writing for them for ~5 issues and it's going well.

What can you bring to The Order which others cannot?

I have extensive worldly experience. I will bring fresh and unique perspectives to every aspect of the group.

What are your skill sets?

My skill set is diverse.

I am skilled in the field of marketing and advertisement. I have experience handling the marketing and advertisement of my mother's business. In the year I took over, I upped our income from just one line by \$100,000+. I can provide screenshots if requested.

I have extensive experience working with Photoshop. I have been using it for ~5 years.

As a psychology major, I understand human behavior better than most. I work well in groups and understand the dynamics of them. I know how to create healthy work environments and increase the proficiency of groups.

Also, as mentioned above, I am a skilled eWhore. I've been doing it for 6 years.

What do you understand about HF's gambling rule?: For some members that are not well rehearsed, HF's gambling rules can be rather vague. When running a group gambling service, it's essential to be well antiquated with the rules and regulations regarding gambling onsite and off to avoid getting unnecessary infractions. I can assure you that I am well aware of the rules regarding gambling, and I will be sure not to bring dishonor to the group by violating one of those essential policies.

Do you agree to the group terms listed below?: Absolutely. All of the groups terms are non-conflicting with other prior personal commitments I have.

Tell me about your history on HF: I first joined HackForums in June of 2015. Originally, a friend of mine refereed me to the site in May of that year prior, when I discussed the usage of remote administration tools with him over IM. It was around two months later, in August, that I realized delving into the world of malware was a cat and mouse game I didn't want to play. Instead, I had always had a keen interest in the world of sports betting. Sports has always been incorporated into my life in one way or another, so when the opportunity came to make money off of it, it almost seemed like my destiny.

A bit later down the road came my first "Sports Betting Service" which, in my opinion, was a huge success. In October of 2015 I organized my first betting service which accumulated ~\$9600.00 (\$500.00 USD average per person, although there are some unique cases where the profit will vary) across 200 members accompanied by 14 HQ vouches (we had more members but only 14 took the time to vouch for the service). The next Sports Betting Advice Service(s) still continue today, originating in February of this year after some personal complications outside of HackForums required me to re-prioritize and take a bit of a break. The ongoing service I currently run has accumulated ~14300.00 (from what was recorded; i.e. likely more) with an average of \$800.00 USD per person, accompanied by significantly more vouches. The improvement up to this point has been breath-taking and will continue to improve as my client's acclimate their skills in the sports betting world.

As for me, I am still somewhat quiet of the forums. I tend to spend most of my time, with my clients and with my family/peers. I try to spend the majority of my time improving upon my own personal weaknesses. I have many hobbies on and off the forums I like to focus on and commit to; not to mention I am college bound. This makes for a busy schedule, but one I have set for myself and continue to follow resulting in substantial personal and communal success. Some might call me a lurker (per my 1,383 post count), but I tend to think of myself as someone who chooses their words carefully. Don't let this deter you from my application, I assure you I will thrive within The Order, and will become a long lasting loyal member.

What have you contributed to the community? (Link threads/posts):

[Highly Vouched | Sports Betting Tips | Over \\$3,000 Profit in Weeks](#) - My first October service I referred to in the previous question / also an ongoing service.

[Very Highly Vouched | Over \\$5,000 Profit | Sports Betting Advice](#) - The December (2015) service.

[Most Experienced | NBA/MLB Sports Betting Tips | Ex 200 Member | Over \\$10k made](#) - An ongoing service in the Premium Sellers Section

I also have numerous successful deals on the site making me a trusted and HQ user (according to my peers):

(These are just a few, I use to exchange currency pretty regularly and didn't always have to post on threads, just PM's).

How often do you gamble?: Because of the service I host, I end up gambling on a regular basis, not just when I need money. To ballpark-it, probably multiple times a week. That is just me though. When my clients gamble, I also gamble. This results in research towards new techniques and predictions; again, always improving.

What type of gambling do you do? What platforms?: I do sports gambling which includes spreads, o/u, and straight ML wins. I generally use nitrgoensports and directbet to place my bets on via BTC.

Are you currently in profit?: By a long shot. If you don't make hasty bets, and instead plan your bets intelligently and effectively with complete conviction, I find there is a very low chance of loss. If you don't believe me, my proof of success below may certainly convince you otherwise.

I love poker from the bottom of my heart, my dad showed me how to play it when i was very young. When i got the legal age in my country i started playing poker everyday, every hour. I got very good at it but had problems with controlling my bankroll. So i stopped for a few months ago and started betting instead, right now my profits are above 2000\$ (only live betting). I'm mostly playing on Football, Handball and E-sports. Sometimes i go to my local casino to play Blackjack and Roulette but only for fun since i dont see much stability in these games. I also enjoy playing Poker at some local clubs, and i do win a lot actually (1,2nd place)

How often do you gamble?: When I can afford to. The last thing I do is gamble to make money. I gamble for fun, so when I lose it's not upsetting or affects me or my finances.

What type of gambling do you do? What platforms?: Bitcoin. I gamble usually on dice sites, sometimes play a bit of poker. Been gambling on dice for over 3 years now.

Are you currently in profit?: I'm well in profit, so much that I don't think I'll ever go down (heck, i've spent most of my winnings anyway, that would be impossible)

Big wins you've had (Provide screenshots/links): To many to count, but here are some bitdice accounts that have a nice chunk of profit on them.

bitdice was a while ago, JD also a while back. Just-Dice at the time clams were 0.006BTC = 43.2BTC ... now they are only worth 0.0016BTC each meaning that's around 12BTC up.

Well I started of HF in the SST section and give my first tutorial back in Jan last year, I then ran a couple of stressers but around July I decided to leave that dodgy shit and build up a reputable business instead, that when I founded YourMCHosting, from then I got heavily involved in Minecraft servers and now that is my go to section on HF.

Do you agree to the group terms listed below?: The terms seem acceptable to me, so yes, I agree.

Tell me about your history on HF: I've been a user since 2009. Admittedly, I wasn't active the first few months since registration, however, I slowly adapted the the community. Ever since I came to discover the Marketplace, I have been highly active there conducting trades (from account sales to my latest venture of [currency exchanging](#)).

What have you contributed to the community? (Link threads/posts): I have purged a lot of my threads due to my attempt to keeping active threads in order. I will post what I can dig up:

- <https://hackforums.net/showthread.php?tid=306168> | Was experimenting with coding and created a basic AIO tool that consisted of a crypter, icon changer, binder, etc.

- <https://hackforums.net/showthread.php?tid=3359619> EnhanceViews Guide

I realize my contribution references are on the low end, however, as I mentioned before, I am mainly active in the Marketplace. However, I do participate in discussions within the forum, I just don't create threads much. You're free to view all my threads to get a better understanding.

What can you bring to The Order which others cannot? It's hard to say what I can bring opposed to others, however, I can share my knowledge. It's a broad aspect, but I feel as if there are a lot of things I can share that many are not aware of, and may have beneficial.

What are your skill sets?

I personally have a major in Marketing which I earned last year. Again, as mentioned sparingly throughout my application, I am active in the Marketplace, and that is due to my business background. I don't claim to be some "money-making guru", but I personally excel at sales. I'm also pretty successful (or was, rather) in CPA. Although it isn't much proof of my earnings, you can view this thread a user randomly created on me when I was actively doing CPA:

Do you agree to the group terms listed below?: Yes.

Tell me about your history on HF:

Well, I wouldn't say I have much of a history here as I'm relatively new. I have been an avid forum user for some years now, really bouncing between a few forums (that have since shut down), I was googling Blackhat and Hacking Forums and Hackforums came up, unfamiliar I asked my friend who said at one point in time he used the site and said I should try it out. I came here with the intentions to use the marketplace and discuss blackhat things (which I found out wasn't allowed). I decided to stick around and in doing so, I've began my own card shop that profits over \$1,000 a month, even tho it hasn't even been a whole month.

If I have the money to play with, as much as I can.

What type of gambling do you do? What platforms?:

Satoshimines is my goto, I play scratch offs very often (I'll buy a roll ((298)) \$1 tickets at a shot usually), I bet on basketball games, sometimes football if the spread is in my favor.

Are you currently in profit?:

Yes, between my internet and personal life business sales, I'd say I am in a 5 digit profit margin since December. I'm very good at money management, tho I invest my money in long term partnerships so I'm set up down the road.

Tell me about your history on HF:

I joined back September and I've enjoyed every moment. I came here to game and listen to music some of the people post but I have started posting in a lot of other different topics. I have helped a lot of other people out via skype and taught them the skills I have. My computer life at the moment is very boring. I hardly have anything to do and if I do something it's either playing a game online web or working on my instagram account.

What can you bring to The Order which others cannot?

Fun is a main one for me. If no one brings fun I will. I have lots of good news and like to tell stories to other people and make sure that there day is going good. I also like to make sure people are enjoying there day and I like to have random chats with anyone. :) Some members on here may have short temper or just plain arrogant, I'm friendly and like to sort every situation out. I'm only on HF for the fun side and I know this may sound like complete bollocks but literally, I have no other skills set, I can't code or anything so I have nothing else to do other then help people or just find something to do.

What are your skill sets?

Gaming, Social media, Advertising, Friendly. I do specialise in helping other people out ;)

Gaming:

I have done a lot of gaming in my time. I used to run Minecraft servers, RSPS servers, GTA SA servers. Was one of the best times of my life running some of these servers and I enjoyed every moment of it. I learnt a lot of new people and made lots more experience.

Social Media:

Ran many accounts for other people and I currently run a 3.4k IG. Social media is a very cool thing to get into to learn new things and make money from. I have made quite a bit of money and have learnt new things. Also social media is probably my strongest skill set at the moment.

Advertising:

I do quite a bit of advertising, since I am good at social media I tend to use social media to advertise whatever I am advertising. If not I either post a lot on other sites or for example now I am learning SEO so I will be using that. I can do this for a few people in the group.

Friendly:

I have always thought, give respect, get respect back. This is a big quote kind of thing for me and I always think that when talking to old/new friends. Respect is a main part for me and I always tend to give respect.

E-whoring:

Since I have started e-whoring which was a few years ago I have made quite a bit of money. I stopped for around a year and now I started back around a month ago. I always try to help other people out since I am in a group on skype and I always feel the need to help out.

What have you contributed to the community? (Link threads/posts): Like everyone, I post on threads my opinion and stature on the matter. I've attempted to make a riptide logo, and logos for other people as well. (Commonly in the request for free section)

What can you bring to The Order which others cannot? Individuality is an aspect everyone has, like everyone else here; we all have special skills. In this case I'd bring more posts, a chance for conversation, and a reason to debate without causing ad hominem.

What are your skill sets? I can code fairly well in HTML/CSS, I can make graphics. I can video edit/record videos if need be. I'm fairly intelligent (with that in mind, I can also meme around, make jokes and whatnot.)

Tell me about your history on HF: I joined HF from an irl friend because he mentioned I could sell RS gp on this site. That being my first intention, I became active in the Runescape section and started buying/selling RS gold. Also around that time I was looking into Graphic design. HF has helped tremendously with my work in GFX, through inspiring works, constructive criticism and so forth!

Im also very into researching, psychology, sociology, sacred geometry, and much much more topics that are about learning from our past and how we act as humans today to help improve our lives and the Earth we live on. With that said I've gained a reputation for myself in the SRPP section.

I went inactive for around 6 months, due to school and time. Before my inactivity I was apart of two groups (Nightfall & l'appel du vide). But more recently I've stumbled upon some very insightful information on a wide range of topics. I would try to explain myself but this app would be a couple pages long :P I highly suggest you look into Michael Tellinger. With me looking into archaeology, astronomy, physics, sacred geometry, numerology, etc... I started to become more active on HF again :D

What have you contributed to the community? (Link threads/posts): Through my two years on HF I've been in and around almost every section now (Gaming, Apple ware, coding, graphics, marketing, SRPP, vices, etc...) and I try to supply some type of contribution whenever I can. Because I've found this statement: When you give in abundance, you receive in abundance to be very true along my journey.

I've done an array of giveaways:

What can you bring to The Order which others cannot? Positivity! - unfortunately we live in a world where negativity is rewarded and positivity is looked down upon. So this characteristic is not in many people. A positive movement is occurring on Earth which is great because more and more people are starting to realize how much we can benefit as a whole when we work together and unite with positive energy. (again I've looked into all aspects of this from the mathematical side and philosophical side)

Sensational GFX work! - Im going to open up my own service on HF soon for all types of GFX needs and I think it would be fair if there were a small discount to any groups I was apart of! :-)

What are your skill sets? One of my main assets I take pride in is learning things quick. A small irl example is how I wanted to impress my friends by showing them what I could learn in 1-2 weeks. And within that time I taught myself how to juggle, how to spin a basketball on my finger, how to do a standing back flip, and how to solve the rubix cube in less than 3 minutes.

A second asset of mine is intellect. The brain is just like any other muscle in your body and with exercise comes strength, and I've gained a thirst for knowledge by exercising my brain.

Finally, I'm prolific and sociable! My inner creativeness comes out through my GFX and if you knew me as a person I am genuinely fun to hang around, I guess an internet forum will have to do.?

If you got this far, thanks for reading!?! Ill end with a quote.

"A strong man stands up for himself, a stronger man stands up for others."

What can you bring to The Order which others cannot?

I'm going to be honest when I say I'm a nice and friendly person. I'm always trying my best to help people in any way possible. I have a lot of knowledge when it comes to social media and it would be an honor to help anyone in this group with that.

What are your skill sets?

Social Media

I've been working with Social Media for almost 2 years now and I'm confident that I know more about any social media network than most do.

Marketing

I've had dozens and dozens of shops open on HF. Whether it's social media or just bots or other things. I've had people come to me with their products asking me to market it for them. When it comes to marketing and sales, I know what I'm doing.

Tell us a little bit about yourself:

I'm a 24 year old male living in Miami, FL. I work from home. I do Social Media Marketing, PPI, CPA, etc. I'm also trying to get big on Youtube. I guess you can say I'm an entrepreneur.

I take care of my mother, brother, and sister ever since my stepdad passed away a few years ago. So it's a huge motivation to me to succeed in life in order to start my own personal life and continue to help my family even if I'm not living at home.

Thank you for taking the time to read my application. Whether I get accepted or not, this is a great group and good luck to all applicants!

Tell me about your history on HF:

I joined HF in October 2013, i was a typical script kiddie looking for well-hitting booters so I can become a leet haxor. My beginnings were hard and slow and I didn't pay much attention to HF, but then I saw these endless money-making opportunities and realized that HF is actually a goldmine. I started building my rep (doing free designs mainly) and then my first products were released. Since then I spent most of my free time on HF (3 months time spent online) and made a living off of this forum. I met many friendly members here, that even helped me recover my account when it got stolen. And now, here I am. From the script kiddy buying booters to a stresser owner writing an application to The Order.

+ one huge contribution coming after this weekend, can't reveal what it is (yet)

What can you bring to The Order which others cannot?

My knowledge. Many people take me as a "nerd", altho, I don't feel like one. I'm experienced in SST (server stress testing), server administration, web-development, designing & marketing. I'd gladly share my skills with other members, i'm polite & friendly.

What are your skill sets?

SST (Server Stress Testing):

Altho my products associated with SST are still pretty young, my knowledge is not. I knew basics since I joined HF and kept improving myself since so I could start & manage my own stresser.

Web-Developing:

HTML, CSS, JS, PHP, SQL. Languages I master. Most of my products were coded by myself and I'm proud of that. I'm capable of doing almost any website using these languages.

Graphics:

Started with photoshop 6 years ago. Back then, terms like "color schemes" or "blending" were unknown to me, but now, I teach that others.

Server administration:

3 hosting companies on HF were owned by me. I'm not saying they were very successful, but I was able to fulfill my customers' needs and manage the servers.

Marketing:

Yes, this is what my living's based on. Marketing's not that easy, but with enough knowledge a huge amount of money can be made, and I achieved that. Well, I didn't become a millionaire, but for a 16 y/o I made myself a very nice pocket money.

I can bring an enjoyable inviting experience to new members looking to learn new skills. I am extremely motivated and active on HF, I will try my best to help people with anything that is needed. I am talkative and have very good grammar, I plan on getting very active in the White Hat helping section soon because I know a lot about virus removal.

What are your skill sets?

eWhoring

I have been eWhoring since Sept. and have gotten to a mentor level of skills.

GFX Design

I've been studying Photoshop in school for the last 2.5 years and I also have a design certification from Adobe.

I've built up a love for the lounge, having discussions, and helping out in innuendo. I met loads of members who got me into the marketplace, and have taught me many valuable lessons that I attribute as being part of the reason I am who I am today.

Over the years my activity has faltered a bit during hard times or when I've needed a break. HF remains my favorite forum, and I've learned a lot. I hope that journey continues.

Tell me about your history on HF:

My history on Hackforums was all about to get myself informed about the latest Hacking Tools and anything that was related to that. I got myself active in the Remote Administration Tools section the most, after getting the information I needed, I started contributing it to anyone on Hackforums. I started making helpful threads with loads of information. I started assisting people over Join.Me or Teamviewer and I've got a lot of valid vouches from members on hackforums.

I've been in groups that a lot of people wanted to get into but did not had the required skills to be in such as Legion and the Illuminati groups.

Those groups contributed a lot of money from their own members but contributed as well tutorials and different giveaways.

After that I did a quick switch to the Marketing section. I started partnering up with people on Hackforums to create products/services to offer on Hackforums. I've owned 5 or 6 projects that contributed myself a good amount of money. I have then made bad but also good investments to get

myself higher-up in what I did. Projects that I used to sell were Crypters and Stressers/VPNs.

What can you bring to The Order which others cannot? I consider myself to be very knowledgeable in online business and marketing. But what makes that skillset unique is that I am very willing and always glad to help others out and contribute. I also have a fair amount of gambling experience. I previously ran a fairly large gambling community on Runescape a few years back, I also occasionally bet on football matches with my friends and am currently setting up an account to trade some penny stocks (I consider that gambling haha)

What are your skill sets? Social Media, Marketing, Building Relationships with People, Leading Groups, Fitness

Thank you for taking the time to consider my application! ?

Yes, i defenaitly agree with this.

Tell me about your history on HF:

So basically I was on a Skype call with my friend Oscar, and he bring's up this topic about hacking. And he said,

"I kinda want to get into the hacking community" and then later on he found this forum and asked me if I wanted to join with him and I said yes sure as I also wanted to get more into the "hacking community".

So as a new member to this forum, I was a complete retard, I posted low-quality content and didn't know anything about the rules.

Now I know a lot more about the rules and I respect them very much. And later on, he quitted, but I did not, as I was addicted to this Website and I said yes, sure as I also wanted to get more into the "hacking community". So as a new member to this forum, I was a complete retard,

I posted low-quality content and didn't know anything about the rules. Now I know a lot more about the rules and I respect them very much.

And later on, he quitted, but I did not, as I was addicted to this website and I just couldn't stop browsing it, So I thought why not buy an upgrade? So I did,

I bough L33t. I have changed my name a lot, but I will stick with this name.

What have you contributed to the community? (Link threads/posts):

I love doing giveaways and guides, but I'm still kinda new to doing guides and i would love to learn more, but here are some of the threads:

What can you bring to The Order which others cannot?

I'm not really a "different" guy, I'm just another normal member of this community, but I have always been happy to help and as well I'm an experienced editor so I can help some people with that too. I

guess I'm a very nice person and if I see a fight, I'm willing to stop it.

What are your skill sets?

As I said earlier, I'm an experienced editor and know's a lot about the "editing community" as well, I know some things about Photoshop and editing photos. I guess I have some gaming skill's as well "not to brag" but I reached Global elite in the game called Counter-strike: global offensive.
