Yes it is indeed, and \$70 is for unmetered BW addon for \$50 server,i have some some more powerfull servers in stock aswell, priced \$150 as i stated in my earlier post, those servers are just limited to sell, and there BW is unmetered in the initial cost.

so \$120 for unmetered?

if u use 10TB can you then opt for more if paid for?

onshore or offshore?

do u have a website? if not i would like to speak with u further?

can u show a double dstat of a sending server and a server receiving the full spoofed port so we know none of the packets are dropped?

We are currently working on it, this is to make the service more stable & this wouldn't happen again that's why it's taking long to build a strong and one time platform for the servers, your data is in backup and you will have the same servers and all servers will be restored to the state they were at your use, We will also compensate the time it's been down in your billing period, so please be patient and give us sometime, we are not going anywhere!

My presence on this service was little to none, therefore I don't know how much everyone paid. I can not guarantee nor deny a refund. The servers are actually up (from what I was aware of) but no ones able to access their server. I can only guarantee compensation if everything else fails as I could deliver compensation myself.

Meh, I don't really think there will be an issue if I'm honest. I mean, the OP is actually trying to sort this issue out away from Hack Forums which is the reason why some of you guys say he's not responding. I'm well aware of this which is why I've taken control of the situation. So nahh, I don't really think there will be an issue here as it's literally a situation where you either consult with me or you consult with no one ?

As for the refunds, every single customer has asked me for one at one point or another. I can pretty much confirm that I will not personally be giving refunds at all. If you read my previous posts you may understand why. Please no more PMs for refunds.

There's a little bit more to it than that. If I could do that I would and everyone would have their refunds. And correct me if I'm wrong, but that refund wasn't for this exact issue that everyone's facing now. Whilst I may have missed your skype message I left you with a notice and continued to update this thread with the recent happenings.

I'm hoping this can be resolved. I'm surprised emperor isn't responding to anyone though, it does cause concern and anxiety to have possibly lost all of the money.

So, here in lies the problem guys, I hope emperor will fight for the refunds though otherwise there's going to be a lot of problems against his account which will be unfortunate:

No worries. Regardless of what happens, everyone will be at least compensated and that is guaranteed. Emperor not replying shouldn't cause anxiety and concern as you're still able to talk to his partner who has the same amount of power as him. No ones lost money as I will at the very least compensate users.

Edit: Going directly to Tzulo won't speed up the process.

Edit: Going directly to Tzulo won't speed up the process.

I didn't mean any offense. I was already speaking with tzulo on the matter before these issues began.

As for compensation, I know we've pm'ed but can you do me any favor of elaboration? Because if you can't refund what other solution would you have do you think?

I appreciate the responses in the meantime.

NotYourStub - March 6, 2016, 7:05 pm

Tzulo never allowed it in the first place. So mass selling servers from them was a horrible idea unless you don't really care ab your relationships with your customers. Doesnt help that in your caida link you decided to leave the ip so those who didnt purchase can just look it up and contact support. Im assuming an influx of requests coupled with the ip being blasted resulted in this.

MasterShake - March 6, 2016, 7:13 pm

It's official i contacted support.

I was already told Emperor has washed his hands of it and there will not be refunds.

Wires - March 6, 2016, 7:31 pm

I'm replying via phone at the moment.

Keeping options open at the moment at the moment. One type of compensation i was dwelling on was to provide the servers from my own hosting company which hasn't even opened yet. There's a few things being discussed at the moment.

Just to confirm, these servers were not directly bought from me.

Idk how that'll get you a compensation or even your requested refund, but meh, feel free to discuss with Tzulo directly.

All users will be compensated at the very least as I said previously.

Now I have no idea where you got that information from but not me. I don't know where I said Emperor has washed his hands with you guys, I actually said that we're trying to see what we can do about this as shown in the PM screenshot you just posted. As for refunds, I've addressed that 1000 times.

yeah i agree with you

he seemed very legit but by not replying on skype, hf or email, it bugs me
i dont like this but im truly hoping for the best i guess.... HOPING

as i said, rip your money this is what you get for trusting pakis

WaveRyder - March 7, 2016, 6:01 am

Like i said, on skype he claimed refund if server goes down for any reason and now am not hearing back from him, so i will open a scam report after today if i do not hear back from you because this clearly is a cheap rip off / scam.

Marlb0ro - March 7, 2016, 7:06 am

I dont care about that 50\$, its just disrespectful that the OP is not answering anyone and still use the forum..

Ok buddy you can go ahead open up a scam report, no problem in that, but there are usefull tasks rather then replying to each time you want a reply from me , as wires is continously keeping you guys updated, it looks like you want a personal reply from me each second which isn't possible.

Son , you better get a life instead of thrashing other people sales.

I do need to answer everyone seperately, or a simple announcement is enough from your concern, may i know ?

Wires - March 7, 2016, 9:30 am

Idk how the OP not replying is disrespectful. I'll be the one making the decision on what to do which is why I've been active and communicating with the customers. And to address a point stated earlier, if you want to get technical the server's not actually down just inaccessible.

S3Linux - March 7, 2016, 9:40 am

Big Vouch Buy services , really really good service and very very good server for spoof !!!

Knowledgeable - March 7, 2016, 3:25 pm

such a shame when users that should be banned are only temp banned, ah well

anyway, emperor is actively working to resolve the matter but right now it's an open issue with the datacenter and its employees from my understanding. hopefully it's resolved tonight, hopefully, so any scam reports can be resolved.

[2016/3/2 18:38:03] Emperor Khan: they wouldn't enable spoofing

THis is what OP said on Skype, LOL

It seems it won't get solved as it already abused from Tulzo. There is a very low chance to have refund and no use to wait in here. No company will refund you when you do something against their rules.

Knowledgeable - March 7, 2016, 4:20 pm

It depends man, some companies have private deals with sellers to be able to do things like spoofing or scanning etc

But he is correct, if you buy direct you will not be able to spoof or anything from them.

Where have you been, have you read any of my posts in this thread? You're showing yourself to be ignorant after jumping from conclusion to conclusion. Actually read my posts about being

compensated at the very least. This line here "There is a very low chance to have refund and no use to wait in here", is bullshit at its finest considering all my previous posts.

With that being said, I will no longer be replying to this thread at all. I have been more than generous by keeping everyone informed and trying to cooperate even though I don't really have to. This is simply because the servers weren't directly purchased from me and I did not actively participate in any transactions. Some of you guys are pestering me and talking about scam reports like I even have to be here talking to anyone ?. No user will go without at least being compensated like I've said for the 1000th time. Patience and you'll get it.

On that note
/Thread.

MasterShake - *March 7, 2016, 7:12 pm*

What is taking so long anyway?

EmperorR! - *March 8, 2016, 12:32 am*

People who wanted to directly purchase the server from tzulo please go ahead and do not bother me about it.
