Thread: [VPS Host for ddosing](#)

kingfly55 - February 29, 2016, 1:31 pm

Looking for a good host for ddosing that allows spoofing and all that good stuff.

Im making a booter.

All Business - February 29, 2016, 1:35 pm

What's your budget , i've sent you a PM.

kingfly55 - February 29, 2016, 1:50 pm

im trying to get this for a friend, he cant go over \$15.

You will not find a good spoofed server for \$15.

Im making a booter.

You should search for servers in places that aren't really mattering for that activity, maybe russia. I don't recommend VPS for these things, as you'll have issues with the other customers in the same nodes as you. ?

Triangle - March 2, 2016, 4:45 am

I would try # Market <http://pwoah7foa6au2pul.onion/search.php?frc=70> (You will need TOR)

Drunkatwork - March 2, 2016, 3:24 pm

Check out my API shop hackforums.net/showthread.php?tid=5190250

Prices from 6\$, dirt cheap >:DD

AdderallXR - March 2, 2016, 3:59 pm

AMPNode.com Got good server

Kumara - March 2, 2016, 4:01 pm

\$15 will barely getting you half decent hosting for your website, for 1 month.

Don't even begin to think about a half assed source that has no vulnerabilities.

Knowledgeable - March 2, 2016, 5:15 pm

you need to find a way to increase your budget, even a little bit

anyone selling you that cheap is what you'll get, CHEAP

go to amprnode.com and check out the available options

don't be foolish enough to think you're getting anything for \$15 ESPECIALLY spoofing
