Still available. PM for more details.

I was given a vouch copy of this. This post will be updated with my review very soon.

EDIT: And here is my review.

This method deals with registering on a site that gives you free coins daily, and then doing something, which I won't reveal, in order to make more each day.

Here are your daily earnings if you only register for the site:

0.00000002630 BTC
0.00000040639 DRK
0.00002827134 FTC
0.00000036252 LTC
0.00000630775 PPC
0.03577794861 VTA

Now let's do some more math. Keep it going for a year, and here's what you get:

0.0000095995 BTC (0,004132\$)
0.00014833235 DRK (0,00005811\$)
0.0103190391 FTC (0,00\$)
0.0001323198 LTC (0,0004504\$)
0.00230232875 PPC (0,001048\$)
13.0589512427 VTA (0,0003733\$) _____
TOTAL: 0.00606181\$ / year

A little over half a cent per year!

Now, that's the basic method.

Let's do the extra steps and see where that gets us.

Every time you do the step, you increase your daily earnings by a small amount. Let's see by how

small of an amount.

If you did the step 25 times, you would get $25 \times 16\%$ of the daily amount. Let's scale that up to a year.

So, the basic profit $0.16 \times 25 = 0.02424724\$$

After doing the process 25 times over, and waiting for a year, you've netted yourself a nice amount of 3 CENTS!

Just for fun, let's say you do the process maximum possible amount of time - 2500. This time the percentage grew to 19%.

$0.00606181 \times 0.19 \times 2500 = 2.87935975\$$

The process takes around 2 minutes to complete. Doing it 2500 times is 5000 minutes which is 83 hours.

So, you only need to invest 83 hours of your time to start earning close to 3\$ a year.

I also believe that this is against the TOS of the site, so you are also risking your yearly fortune.

DISCLAIMER: I suck at math and I've probably screwed something up.

I can recommend this method to anyone who wishes to invest 1\$ and 83 hours to make a yearly profit of 3\$.

Or anyone who wants to see what this is about, because who cares about 1\$.

Good luck with sales.

Nope.

That was just an honest review of the product that was sold. I explained how it works and what the

earning potential is. I didn't reveal his method.

Just a review stating facts.

FiftyTwo - March 2, 2016, 2:47 pm

Is this an 100% whitehat method?

Pittinger - March 2, 2016, 2:48 pm

If you guys are asking me, I'm not the OP, so I won't answer questions here. This is his thread.

But if you have any questions about the method, feel free to shoot me a PM. I won't reveal or leech it, so don't bother.

Danked - March 2, 2016, 5:24 pm

This is a white hat method, yes. And if it made 10\$+ a day it wouldn't be 1\$ lol..
