Thread: [How to attack a CloudFlare website with under attack mode?](#)

NepentheZ - March 1, 2016, 11:17 am

How to attack a CloudFlare website with under attack mode? Anyone know what the best method is to do this?

HTID - March 1, 2016, 1:11 pm

(Mar 1, 2016 12:17 PM)NepentheZ Wrote: [\[CITE\]](#) How to attack a CloudFlare website with under attack mode? Anyone know what the best method is to do this?The only way i can think is by using a resolver and then nmaping the ip and then attacking from there

FSBN - March 1, 2016, 1:15 pm

Captcha or 5sec waiting mode ?

5sec waiting mode.

(Mar 1, 2016 02:11 PM)HTID Wrote: [\[CITE\]](#) The only way i can think is by using a resolver and then nmaping the ip and then attacking from there

No, they have an OVH server so the real IP does not matter

I just want to attack their webserver

How can I do that?

Niko - March 1, 2016, 6:26 pm

Post the website here, and I'll kill it.

I haven't found any which can do this.

Niko - March 2, 2016, 3:14 am

Sites Down.

Should Be for a while now ?

151rum - March 2, 2016, 4:12 am

Got to get the servers real IP bro its the only way

Niko - March 2, 2016, 4:14 am

No it isn't.

There are a few bypasses for cloudflare that pass the verification page.

SaghyEGNL - March 2, 2016, 4:30 am

I knew a thread that was disguising this but I forgot the link...

Forget About Me - March 2, 2016, 4:40 am

Theres plenty of scripts out there to bypass the 5 second wait thing
or you could try getting the backend ip and attack http://ip

NepentheZ - March 2, 2016, 6:46 am

Wow im interested asf to know how you took it down but you might not helping me with ddos sht

Anyway, can you help me to take down a cloudfare site please

NepentheZ - March 3, 2016, 9:09 am

Anyone?

If you can send me a PM or tell us here how.

cryptobahari - November 3, 2018, 12:07 am

anyone can give me insight?
