It's doubtful that many users on HF have one, and if they do, It's self coded and/or they wont be too public with it.

yes i have friend who has a p2p botnet.
ive not seen much of he likes to keep to himself.

Hoodie+ - March 2, 2016, 2:01 am

I knew a guy from HF who apparently had a P2P botnet.
He got doxed and banned from HF for some reason...

ma?ns - March 2, 2016, 7:39 am

Can anyone let me contact people who own a p2p botnet? I'm pretty interested

P2P is a protocol.
And no, P2P is not a rat.

._.

this is if you find someone willing to sell. Try a REAL P2p Botnet (Storm Worm) for example, would cost you around \$100,000 and a team of coders...

Besides you would need atleast 10,000 nodes MINIMUM to even start a P2P Network

I've never said this but you are as retarded as my grandmother's cat.

Storm is older than my grandmother's cat, nobody uses it because it's currently useless.
