Q: Am I guaranteed to profit off this book?

A: Although I almost live off the profits I make with this book I still can't promise a guaranteed profit since it's gambling. However, if this book is used correctly that chances of profiting huge is likely.

Q: What makes this method so special over the rest?

A: This is a guide, a way to teach how to seriously profit big time off of bustabit. This isn't some mediocre method with some quickly written ebook. This is the real deal, if you want a book that offers real methods for real profits this is your go to. Also this book is very detailed it trains you from nothing so no experience is required.

Q: How much can I profit off of this?

A: The sky is the limit:

Lets say I wanted to earn atleast 100\$ each day with this.

Can it 100% securely be done? How much would I have to invest before getting it started?

And how much work each day deos it require to make the 275\$+ you mention in the title?

I might purchase this later today if my questions are answered :D

Also will I see profits the first day?

?euces - March 5, 2016, 9:52 am

Now the great thing about this book is that it has variety. You can choose how much you would like to invest and the more you invest the less time it takes you to profit. With a \$10 investment in to the game you can reach your goal in maybe 1-2 hours of work on bustabit where as if you invested \$50 you could make that \$100 in 30 mins. Now I'm not gonna claim your profits are guaranteed because I like to be honest with my customers, but I can ensure you that if you do the work with some effort and patience you can generate some very good money with ease. Also my mentoring service helps out a lot too. And yes you can profit as soon as you purchase the method and read over it this doesn't take time it's instant profits.

I made a lot of profit off this as you can see but it takes time and effort. I would stay up till 6am on weekdays grinding money with this because of how addicted I got to money and my school marks just started dropping. So instead I decided I would release my methods and info for a set price so that I could still make some money while helping others and focusing on school.

Sophocles - March 7, 2016, 7:14 pm

So basically you are saying you found a way to beat the house ?

Let me get this straight, if you are claiming this method or whatever it is brings profit, then it does beat the house.

Basically, at least 50.1% of doubling your BTC ?

What is disturbing is, if you really have your way through this, why in the hell would you sell it for \$30 ?

Just do what you do over & over again and win your free money, forget about the ebook what sense does it make ?

What I love is that, you wrote :

Quote:MAKE PROFIT OR I'LL GIVE YOU A FULL REFUND!

And what about the lost bitcoins ? Basically you're just taking \$30 to allow people to gamble their money, if they happen to win, you're keeping 30\$ and if they lose well no problem, it's not your money.

I can make the shittiest gambling method on earth, you will still make profit using it as long as you're not going for big bets on bad odds... And let's say people are stupid and go for x2 at 49%, you're still making 15\$ per client even if you refunded all the losers!

You are claiming that you went from 0.2 BTC to 3 BTC in a few hours with your method. So you're not saying it was luck right? Or maybe a bit of luck over the top ? Well still... Would that mean I can, at the least, multiply my BTCs by 10 using your method ?

Anyway, I'm 100% convinced this is pure bullshit and you're basically stealing money from HF users.

Now if you're confident about what you're doing, send me your eBook and I'll gladly test it myself and update here aswell as pay you. But then again, if it works, you certainly shouldn't send it to me and rather keep it for yourself.

All in all I am 100% sure you would have no reason to share this so called method if it worked as well as you describe it.

Sorry for the sales trash but I think this is just over the top. There is no chance your method works, why ? Because if it did, you certainly wouldn't be selling it. This is just pure social engineering & trust abuse.

Now again, nothing personal mate, I just had to react cus I'm seeing too much of this on HF.

If I am mistaken (0,0001% chance), then please accept my sincere apologies.

You do realize bustabit has player odds giving you the opportunity to beat house odds. Ryan confirmed that house odds landed somewhere in the 0.3% section which is already very little. Now on top of that there are these things called player bonuses. Play strategically and you can make the odds in your favor since bustabit technically is a player vs player game with a house involved. That is where this method comes in to play. I found the most effective and efficient methods to profit. If you would like more info on this please add my skype: deuceshf

Yes I know that, but as you stated it's just a little over the house edge and clearly isn't what you're using to go from 0.2 to 3BTC.

Anyway, I'll add your skype.

Btw do not believe that 0.3% house edge thing. It's a total lie. That would work if you and I were bots and could play our money with a set objective and keep to it without stressing about the money involved. But statistics show that players tend to go for big runs with small bets and small runs with big bets.

Since there is a 1% chance it drops before it starts, house makes bank on such behavior.

I don't show my profile because it gives away the methods. This isn't some shit auto-pilot script this is legit manual betting and takes time and effort. The graphs give away what happens since it is manual betting. Please try to think about these kinds of things next time and please refrain from using the sales thread as a question area. That's why I have skype: deuceshf
