Thread: [Little forum hacking](#)

FreakNeo - March 3, 2016, 7:00 am

Hi !

I'm looking for someone who would be able to find a critical flaw in this forum. The coder have a poor level, but my pentesting skills are not good enough to find flaws in his code. So I was wondering if one of you would be able to find something interesting ?

I don't have money to offer, but I can crypt you for free if you want.

Thank you very much ! ?

Link : [avenoel\[dot\]org/blabla.php](#)

EDIT : I may add that you can find another version of the forum at this adress (with a potential upload flaw) : [avenoel\[dot\]org/v2ndx](#)

=> If needed, I can provide you the source code of the upload form (I know where the coder got it)
