Thread: [Anyone Have an Agency Email](#)

Ticoma - March 3, 2016, 10:42 am

Does anyone have a government email? I want to get a few ebooks about investigation/crime methods but I need a government email, which is unfortunate.

Travis Bickle - March 3, 2016, 10:42 am

Money saving time from me to you, don't buy any eBooks.

?Criminal - March 3, 2016, 11:35 am

amazons ebook section is worth every penny your not gonna find many useful ebooks on hf just money making stuff but its a good resource to find amazing books, you don't need a government email to learn about the same techniques what you want to look for is private investigator books and material thats where I learned alot of stuff theres tons more sites on the internet that sell ebook copys of physical books as well just need to look around since amazon doesn't have every single book.I personally learned alot from ebooks so I recommend them fully.Programming, web app hacking, PI, some linux knowledge etc I learned all from books and talking to other people who are versed in the same subject and hearing their experiences.Google play store has a decent book selection as well.

are you oblivious to everything I said you can get similar content without wasting time, you're not gonna get a government email that easily if at all i'll tell you that now all government mail servers are monitored.Everything in that cop book can be found in private investigator books they do practically the same stuff and alot of cop manuals and handbooks get leaked on cryptome anyways.

Ok Guys. He asked for a .gov email, so he can get some ebooks. If he is asking, he probably went through all of your options. So stick to the questions.

@OP: I know the method to get .edu's came out about 8 years ago, and today it's booming.

I would assume that you could maybe get access to a .gov the same way.

I'm sorry I can't offer much help, but what I do know, is that you would be better off knowing someone with one instead of trying to get one.

I'm guessing the ebooks you want, can't be downloaded by a non gov person, meaning that its good info, and it sounds like you are just looking for some research docs to study.

I can't help, but if I happen to run across something, I will post here.
