Goldmouth - March 4, 2016, 10:33 pm

Gaudox HTTP Bot (1.1.0.1) | C++/ASM | Ring3 Rootkit | Watchdog | Antis | Stable

ORIGINAL THREAD: <https://hackforums.net/showthread.php?tid=5022902>

I would run builder in VM.

SIM-1980240 - March 4, 2016, 11:08 pm

Was the original builder backdoored? The MD5 matches the original so this looks clean to me. Thanks for sharing with us! It looks like a really stable bot.

My Computer - March 4, 2016, 11:11 pm

Thanks for sharing OP. ?

This will be useful for many people, including me.

Russ. - March 5, 2016, 12:44 am

This is fucked up if the developer closed it...

Osmous - March 5, 2016, 1:00 am

Looks good, thanks for sharing!

Insane Developer - March 5, 2016, 4:26 am

Well the original developer removed the dl link from his thread, so personally I think that you should remove this link. The developer probably had a reason to remove the download link.

Chan Wong - March 5, 2016, 8:23 am

Does it have any BH features like pass recovery/form grabber?

thumbs up man!

I think that if the community shows interest / support in a certain project, especially one that is a VERY good and has been closed that maybe that would inspire the dev to continue with the project or other dev do the same. This by any means isnt a private project so when people like myself were looking for it and couldn't find a download link its only fair i share since the dev himself said he didn't have a prob with that. I lel at the neg comments and their sigs.

PONI Walker - March 5, 2016, 1:10 pm

thanks for sharing ?

desmond88 - March 5, 2016, 2:11 pm

Can this good crypted cause the startup from bot builder cant disable ?

taco85 - March 5, 2016, 2:52 pm

Remember to check MD5 sums before to run this. In my opinion this is the best free loader :)

Goldmouth - March 5, 2016, 2:58 pm

The sums all match its clean.

wyrms - March 7, 2016, 1:21 pm

thanks for sharing nice download

Uni0n - March 7, 2016, 1:26 pm

hope its safe

(Never used a botnet)

I just upload to my host/connect/test right?

Goldmouth - March 7, 2016, 2:18 pm

Just dont use the crypters start up.

Insane Developer - March 8, 2016, 3:07 am

SHA1 and MD5 matched, seems clean.

motherrussia711 - March 8, 2016, 7:52 am

Thank you for sharing sir! ?

rageSpreed - March 9, 2016, 5:03 am

Thanks for share man.
Downloading!

Goldmouth - March 11, 2016, 10:26 am

Wanna remove the negative rep buddy?

column - March 11, 2016, 5:21 pm

i looked in the panel for KEY #1 and KEY #2 dont see them?

Goldmouth - March 15, 2016, 2:25 pm

(Mar 11, 2016 06:21 PM)column Wrote: [\[CITE\]](#) i looked in the panel for KEY #1 and KEY #2 dont see them?
The builder generates them.

CHAOs - March 15, 2016, 7:47 pm

Thanks for the share man!

Russ. - March 15, 2016, 9:53 pm

(Mar 11, 2016 11:26 AM)Hostah Wrote: [\[CITE\]](#) Wanna remove the negative rep buddy?
My statement still stands. Rep is how I view you. You did something I did not like(even if developer gave premission in a post on his thread).

Punisher - March 15, 2016, 10:01 pm

That's pretty messed up, the developer gave permission.
That was your whole basis of giving him the rep in the first place..

Good job OP for the share, most of us appreciate it ?

Goldmouth - March 16, 2016, 6:02 am

(Mar 15, 2016 09:53 PM)Watson. Wrote: [\[CITE\]](#) My statement still stands. Rep is how I view you. You did something I did not like(even if developer gave premission in a post on his thread).

Really? well I think you are full of shit.

See? lol. Fuck you is how i see you.

AND

Now ill close this thread and remove DL link. AS PER THE DEV REQUEST.

Hit me up if you want this project.
