--==I AM NOT ACCUSING UID:5182316 OF COPYING THIS SCRIPT IT IS JUST VERY SIMILAR!--==

This is a message to everyone about safety and awareness when using and more importantly buying Bustabit scripts.

Hello all,

I thought that I would jump into this arena while it is still hot and add a little freshness to it. So here goes.

The script that is being brought into question is Black Shadow's 'Anti-Bust' script. Everyone has seen his deal dispute and his threads about it. I will spare myself the time and not link them because I assume if you are here you have already seen the threads.

Now, the person who Black Shadow is claimed to have copied his script from has actually copied the script from 'Sakuto' UID: 695943

Here is the script which Black Shadow is said to have copied off of:

<https://hackforums.net/showthread.php?tid=5182316>

Here is MY post regarding a script that I needed changed to try to get the most out of it. Safixk was a person on Bustabit who created this script I posted. It was originally just for myself and him because we were on it together. We later released it to the public because it was only resilient to 4-5 loss streaks. <https://hackforums.net/showthread.php?tid=5118804>

If you scroll down to the bottom of that post you can see Sakuto's post with the completely edited version he made. Compare the two scripts STARTING FROM THE BOTTOM and go up. Nearly EXACTLY similar.

Now I am not saying that TheEntrepreneur has copied this script from me because I certainly know he has not and I know that this script is public, but I want to bring to light that it is not only a little known script. This script is VERY public which was made by Safixk. In fact, if asked, Ryan will actually LINK this script and many other variations because he knows that busts are likely and he will get the money back.

Scripts on bustabit are overrated and very much oversold on many marketplaces. Be aware when buying scripts that the likelihood of them being public is very high.

Why the fuck can't people just reply instead of making whole new threads.

Ace Of Jesus - March 5, 2016, 6:51 pm

Yeah, this is just making more drama, stop/.

If you read TheEntrepreneurs threads with open eyes he says he has posted a public script and its not his own.

So basically all scripts are public and people just change name to credit themselves or earn money. Nothing new tbh.

Like OP said the scripts are VERY PUBLIC anyway.

He isn't talking about BlackShadow even though his title states his name.

OP I'd suggest you to change title to "Bustabit scripts" or something similar

Shut the fuck up already about black shadow. There's enough drama on this forum already.

Breaking News: People who gamble make stupid choices

-snip-

OP I'd suggest you to change title to "Bustabit scripts" or something similarTo address to first thing you said: I do not know if you are talking to me or not. haha, but the first thing I wrote is that I am not accusing him of doing it on purpose. You might be talking to other people, though. I don't want to come across like a dick.

The second thing you said, I did. Agreed it does create a lot of drama

Now I'm pretty sure from wherever they copied it might be a same source. (That could be you, if you claim to have started this script trend.)

Nothing is original at least when one is selling it.

Because such scripts one sold are never private people share it with their friends and chain reaction
