Implying we dont have enough secure downloads already?
what do you offer I dont? ?

'Promise' is a word that has been abused way too many times on this forum. I can't judge though, since I did not check.

Version: 5.3.1F is really not necessary by the ways. That's the legacy version.

How can you make promises you cant keep?
even a CLEAN version fo DC is vuln to he user, so its not clean at all, its a huge security hole, on both ends.

Hmh, it's always those 10-post people that who offer "clean downloads" of an old program.
Maybe there is a connection... Hmm... ?

If anyone actually tested this, let this thread know, please.

Why would anyone trust these instead of Armada's? He released these too and is one of the most trusted members.
