I received a vouch copy. This is a honest review.

Review:

Grammar 8/10

At the moment there are a few spelling mistakes but OP promised me fixing them as soon as possible. The ebook is very well written.

Design 7/10

I like the layout and the design. It's clean but still good!

Method 9/10

I never heard of this method before. If you use this even better than OP already described, you'll make a lot of money.

Price 10/10

The price for this method is really low. You can make this money back really easy.

I would rate this method 8,5/10.

ModernMoney - March 6, 2016, 9:23 am

Could not recommend R2-D2's products any more. HQ stuff!

Ooze - March 6, 2016, 9:36 am

This is my HONEST review of this product

Grammar

Probably the least important part but Ill mention it.

There were a couple of grammar mistakes but nothing that would hinder your ability to understand it.

Method

So its a pretty basic business method but all methods are based around a original method its how you twist and bend it to make it unique and make money.

Does this ebook have the potential to make money, of course it does but all ebooks have the potential to make money.

Overall

All in all this method isn't for the weak of heart it is as I would say Greyhat and does require a small investment.

If the correct amount of effort was put into this money is defiantly there to be made.

However it may take a while for the money to start rolling in

My rating of this ebook is 6/10

Grammar Rays - March 6, 2016, 10:03 am

Okay so I received a review copy of this eBook. I want to say that I will try and be impartial for the purpose of writing this review.

Firstly, as mentioned in the first review, there are some grammar and spelling mistakes. These aren't too bad and don't make it hard to read but they were noticeable. The eBook took me perhaps 3 minutes to read and is 6 PDF pages long with big writing and whitespace. The eBook contains a live example with links/references to websites throughout which is helpful.

The method itself, contradictory to the thread, I have seen this before and I have actually done this before. It didn't make me thousands however it has the capacity to earn thousands after you put in some work. It's also repeatable, so once you've done the method once, you can go pretty autopilot (perhaps spend a couple hours a week on it - OR hire someone to do the work) once the groundwork has been done, and get residual/regular income, and then repeat the process again to create multiple sources of income.

I personally didn't have that much success previously however I was younger, and didn't put probably as much effort into it to start with. I rarely get involved with the eBooks on HF but this method has the capacity to make you a lot of money assuming you can put effort in.

You do need some start-up capital. I'd say < \$50 to get up and running smoothly depending on how you use the method. The more you spend, the more chance you have of hitting those thousands in revenue you probably want to go for. It's very much dependent on how much you put into the method.

This method is being done across the internet. I'm not going to lie, it's pretty well known and there's publically available stuff out there regarding this. But perhaps that's just because I've been on the Internet for 10+ years and have been exposed to all kinds of entrepreneurial and business related stuff. Nonetheless, you can make money with this concept.

I wanted to thank the OP for giving me a vouch copy, even though I am not HF UB3R anymore. I hope this review is sufficient, and I hope you can understand I am being honest.

I hope none of this puts anyone off, and the final say on this is: you can definitely make money using this method.
