Thread: [Firewalled / otherwise cannot connect to HF](#)

Kondekka - March 6, 2016, 10:33 am

Hey, I've been blocked out from HF for quite some time, last time i could connect here was 11.9.2015, i already used the contact section for help.

My IP is static and is from Finland, i use(d) HF almost daily and all of an sudden got blocked for months, i tried various VPN's and proxies but none worked, now i was able to connect via TOR network and i can't use TOR forever to access HF, it feels like I'm connected from uzbekistan with 1 byte/s connection...

And i get this kind of message every time I try to connect

"Access Denied. If you are using a VPN/Proxy/Tor please disable it. This also includes browser features like Chrome Data Compression Proxy and Opera Turbo Mode."

That message was shown on my phone, laptop, and main PC, I checked that no data compression features were enabled and still that message was shown, and every device here has different IP, dynamic 4G ip's, except my main PC which is static.

What on earth is going on in HF? ?

Some countries and IP ranges will be banned because a bad apple (or other reasons) ruined it for the affected users. There's nothing you can do except try to find a VPN or proxy that isn't banned by HF.

Light - March 6, 2016, 11:50 am

You can tell you're connected from TOR because you're matching 6 other members from IP.

Kondekka - March 7, 2016, 8:39 am

Well, I think my time in HF is over then, it took again 20 minutes of trying new identities in TOR and solving the captchas.

Thanks for the responses, take care.
