Thread: [PLEASE fellow Good People Need to Confirm About Spyeye](#)

AnonLiv3 - March 6, 2016, 11:13 pm

Hello.

I'll gladly accept any suggestion and advice regarding this issue please i found an old source of Spy Eye v1.3.48 but i need to confirm if this botnet still functions well and can stick hack Pc's especially windows because i found out it was discontinued.

I'll be glad if someone on here could put me through on how to use the plugins i know how to build the panel and connect the builder but i haven't used this botnet before so i am really New to it and will be glad to find a guideline on how to set it up perfectly for use.

Thank You.

Kabbalah tried to pm you but it says you have it disabled.

Here's the download link.

do you have Skype , Jabber or yahoo bro so we can chat and converse better .

thanks
