Plaese make some reviews about the method's thanks!!!

First you will have to sign up with this site: <http://tinyurl.com/m85pgbn> you will get my autopilot methods if you do that!

I think you all heard about this site, this is a place where people can buy games, key's etc
The great thing about this is that they have a referral program a 3 grade downline that means you will have comisions from your referral and from your referral referrals and so on!

The next good thing about this that if someone will click on your ref link they will get cookies for 2 years, that means if they decide to click your link and afther one year they decide to buy something from the site you will by credited with \$\$\$

Ok the first method is a greyhat one!

We are going to use a traffic exchange to get those cookies into peoples PC! You will say that traffic exchange dont accept your ref link, well thats not true, you will use a normal domain name and redirect the traffic to your ref link, so all of them will get your cookies and you make \$\$\$

Method 2

We are going to use microworkers to get some referrals, you can buy with 10\$ 86 referrals!

Try to explain to them in detail what the site is all about and how it works when you make them sign up and 20-30 % of the ref you get will by active!

Method 3

Another method to get cookies into people's PC is by using <http://www.omegle.com/> where you can talk to strangers! you can send a cookie every 5 seconds!

You dont have to make an account just go to the site and click on chat/whait one second and you are going to chat with strangers/when the chat has opened you send him this message: Hey whana see my naked, im 18 years old, go here(your ref link shortened with tiny.url)

Whait one second and close the chat and start a new one and so on!!!

Im using paypal to get my money but they have other options you can take a look at my status here

Other method's you can use is with youtube make videos about games and you get get a lot of clicks, there are people on the site that made over 250k in one year!

Use social media to get more clicks!

Is it really necessary to hide the link out by a shortener?

It's only a sign that you don't want people to know what's going on with the site itself...

As pushy as your being, the last thing people are going to do is click your link.

checking it with checkshorturl.com/expand.php i think it is g2a.com but the url has some extra stuff i don't know why

complex0ne - April 6, 2016, 11:29 pm

its my link mate it doesnt have anything on it!

anderBender - April 7, 2016, 11:49 am

why don't you put an original url? Shorteners are evil you dont know where it will take you

chronicgamin - April 8, 2016, 1:17 am

shortener urls could be anything these days Porn etc etc

complex0ne - April 13, 2016, 1:33 pm

where do you guys think the link will take you? to hell?=:)))
