Thread: [The only way to win on Bustabit.](#)

Stealth™ - March 7, 2016, 3:48 pm

The key is a low bet with a low multiplier (Let's say 100 Bits @ 1.05x).

If you lose, multiply your bet by 20, and keep the multiplier at 1.05x, and if you win, put your bet back to 100 bits and keep the multiplier the same.

You'll always make your money back. However, you need a big investment (so that you can be prepared to lose 4/5 times in a row) even though you'll just make it back the next round.

Should I release a script for this?

BaiN - March 7, 2016, 3:51 pm

I think a lot of people would be interested in this Stealth, you probably should.

???? - March 7, 2016, 3:51 pm

Yes, make a script. Good method I would say. I think this was once sold for \$200, not too long ago.

If you are referring to the one Black Shadow was selling, this isn't close :P

His was public

Bustabit is fucking time waste ! get some real job if u want to make money otherwise don't waste u r fucking time on gambling sites .

Stealth™ - March 7, 2016, 4:05 pm

If you invest 1.05 BTC (1,050,000 million bits), you can play with 125 bits each game, winning 6.25 bits each game @ 1.05x.

Assuming an average game is around 12.5 seconds long, you would earn 43,200 bits per day on autopilot, equating to around \$17-\$18.

Pretty su this wont work, the rape train is fcuking crazy, its like 15 in a row sometime... Best way is

to play big, the longer you stay here, the more you are vulnerable to rape train ,thats why I go big.

'Cynical - March 7, 2016, 4:32 pm

The way I've been making money is compound betting with a low base amount at 3x.
Double bet on loss, return to base on win.

I stay at 2x, 3x is too risky? Way more odds? :o

The only way to win on Bustabit:

Get lucky, stop playing and enjoy your winnings.

How to lose:

Think you have some shitty method, win a little bit, eventually lose it all because you fail at math/don't have enough money to cover unexpected big losing streak.

Anyone who is claiming to have a working "method" and is not rich is delusional.

If anyone had a real method to beat the casinos, they would be drowning in money, not pinching pennies and wasting their time and effort selling the method of how to do so.

I make a living from Bustabit I already made 500+k bits in the last 7 hours. ?

usol - March 7, 2016, 6:27 pm

As I am on bustabit a lot and I have never seen it go 5 times in a row under 1.05 so I'll try it out man thanks for the helpful post.

lol I see you on and I'm doing the same bets you're doing just with less money.

Heart of Kings - March 7, 2016, 6:35 pm

Or you bet all your money put auto cash at 5x and close your eyes

NarticoG - March 7, 2016, 6:37 pm

This is making me EZ money

make a script and sell it as a Ebook LOL

hugsyou - March 7, 2016, 6:38 pm

black shadow's personal method leaked

Bet like 5 BTC and set at 2x

Jimmie - March 7, 2016, 6:39 pm

This isnt true I have tested and made a few scripts you will get cleaned with red streaks.

You won't get cleaned by a red streak if you don't increase your multiplier ;)

Egregious - March 7, 2016, 10:20 pm

This is simply a modified version of the classic Martingale method. It works, but you need a huge safety net if you want a higher chance to secure your earnings. Is like when people use automatic betting on Prime Dice, setting the base bet to one Satoshi and using a multiplier by two on every loss, and resetting the bet on every win. Nothing special, nothing new.

S?arlet - March 7, 2016, 10:54 pm

This is kind of common sense lmao

?Enlightened - March 7, 2016, 10:56 pm

So you'll invest \$400+ to make \$15 a day WITH the risk of losing?

The statistics might say it's impossible but you're playing in an online gambling facility...not a calculator.

I'm just saying, I've played a ton and I've never seen it hit below 1.05x even 3 times in a row.

I might code a bot later for it lol

The project for it got already created a few days ago. :P

Thanks for the config tip. :3

It's not always just a basic martingale, all the games differ, you indeed can raise or lower your total luck. ?
