You may know the script being used for this method, but that will not cover you from busts since the method is the key factor of making a steady profit and not the script.

T.O.S

1. I reserve the right to change these terms and conditions at any time, and you agree to abide by the most recent version of this.
2. No chargebacks
3. No leaking, sharing or reselling
4. All sales are final and no refunds will be issued, unless you have purchased the Advanced Package and you can provide valid proof after 60 days that you have not profited using this method.
5. By purchasing this product you agree to these terms.

If you violate any of these terms I'll open a scamreport and refuse to sell you any future products again.

easiest way I've found to beat them is to watch the history. Now of course you can't predict the history, and anyone who says they can is lying. You can however make educated guesses. For example if you see a long streak of high crashes, you can to a degree, expect a series of low crashes. Remember however that it is gambling, so you will never know exactly what is coming.

As far as a minimum balance, it says you can start as slow as several hundred (see book) but to make a decent profit fast I'd recommend at least 15k.

I started with 18k approximately and here I am at the time of posting this reply.

Keep in mind with gambling you always have the chance to lose it all. A month ago I went from 2k to 1.25btc and lost it all in an afternoon. (Granted all said and done I profited several hundred that I had pulled out as winnings.)

(Mar 13, 2016 12:42 PM)Arrakis Wrote: [\[CITE\]](#) After my incident this morning, looks like I'm almost back.

Once I get back to 250 I'm going to withdraw 140k to recoup a lost investment on a different project. Then the goal is 1 btc.

(Mar 14, 2016 09:38 AM)Arrakis Wrote: [\[CITE\]](#) Update:

Today's goal was only 500k, but I might get even higher at this rate!

(Keep in mind that I've already withdrawn 140k)

So here's the math. (At a rate of 412)

Start: 18k = -7.42 USD (Investment)

Reach 360k = +140.32 USD

Withdraw 140k = -57.68

Reach 350K = +90.64 USD

Current: 353k = +145.00 USD

Total Profit: +195.27 USD

With an initial investment of ~\$7 I've made over 200, and almost 200 profit. AND ITS STILL GOING.

This method will slowly build up your bits, the more you invest the more you will get out of it. Also as you can see at every major loss it recovers. If you do everything in the guide, you shouldn't ever go down in bits, it should always be increasing. Unless you instantly bust 6 times in a row (almost impossible because instant bust is 1% chance), this should recover every time.

I will be investing \$15 into this and showing you guys the results shortly.

You'll lose your investment over time then. Really depends on your luck - but it's gambling after all.

You should have it take breaks after a loss. I'm a believer in breaks.

I personally haven't gone lower than my initial investment, I've only gone up, same for my friend who uses this. You can try this with a small amount of money if you want to be sure but the more money you invest the more you will get out of it.

Yep the dips are big but it easily recovers, if you have more bits in your balance (50k+) you'll make a lot more. The method also explains how to tweak the base bet depending on your total bits so it recovers from busts.

Haha damn man, that's some nice results. Just keep an eye out ever so often, if the rape train hits, this will try it's best to recover from it, but if you want to play safer instead of using the equation provided you can use the one I PM'd you. This will make base bet smaller and makes it easier for you to recover.

Glad to hear that, also no it's not and it's not the script alone that makes this good. You need to follow the method as well. If you look above, one customer turned 17k bits to 43k in 4 hours. \$10 is about 24k bits, so I'd say 2 - 3 hours to double, the more bits you have the more you'll make.

You only need to do the method once, if you acquire a lot of bits from this method you might want to tweak the base bet according to the method again because you'll earn more but it's not needed.

If you want to make max profit you have to increase your base bet, be sure to follow the base bet equation and update your base bet on the script once you increase at least 10k in profit. Also if you want to make a lot more you have to increase the base bet without following the equation, I'll PM you about this. Good Luck and glad to see you're making bare profit.

Look at the actual bets, the user clearly starts playing by hand in spots (poorly at that). For example when the basebet jumps from 193 to 1000, with a multiplier of x2.

Here's a better example. <https://www.bustabit.com/user/Arrakis> I've been using the script for about 24 hours (not total, but how long I've had it) and only the script.

how much minimum should i start with if i do buy this? just really scared of the rape train

Rape trains are a guarantee, not a likely hood. The easiest way I've found to beat them is to watch the history. Now of course you can't predict the history, and anyone who says they can is lying. You can however make educated guesses. For example if you see a long streak of high crashes, you can to a degree, expect a series of low crashes. Remember however that it is gambling, so you will never know exactly what is coming.

As far as a minimum balance, it says you can start as slow as several hundred (see book) but to make a decent profit fast I'd recommend at least 15k.

I started with 18k approximately and here I am at the time of posting this reply.

Keep in mind with gambling you always have the chance to lose it all. A month ago I went from 2k to 1.25btc and lost it all in an afternoon. (Granted all said and done I profited several hundred that I had pulled out as winnings.)

I made 20k+ bits using this script, after that I was just manual betting it for a while off and on..

Arrakis - March 13, 2016, 7:57 am

Here is a perfect example, I was at 250k this morning from this method and this hit me when I wasn't looking.

The rape trains will come, you just need to make sure your watching for when they do.

Yeah so many people don't understand this, just because it's autopilot you shouldn't leave it on 24/7 unsupervised. You're gambling and there's always a risk involved, if you know when the trains hit you need to take a break for a little. Anyway great profit that you've made.

After my incident this morning, looks like I'm almost back.

Once I get back to 250 I'm going to withdraw 140k to recoup a lost investment on a different project. Then the goal is 1 btc.

Haha no, it's not just the script as I've mentioned. It matters on the actual method which requires you to tweak the variables depending on your playing style as well as how many total bits you have.

Update:

Today's goal was only 500k, but I might get even higher at this rate!

(Keep in mind that I've already withdrawn 140k)

So here's the math. (At a rate of 412)

Start: 18k = -7.42 USD (Investment)

Reach 360k = +140.32 USD

Withdraw 140k = -57.68

Reach 350K = +90.64 USD

Current: 353k = +145.00 USD

Total Profit: +195.27 USD

With an initial investment of ~\$7 I've made over 200, and almost 200 profit. AND ITS STILL GOING.

That's an impressive increase in bits. Also I'm not sure how much you would make an hour exactly because it varies for everyone as there are different game lengths. I'd say probably around 500 - 2k bits an hour if it's done properly. Once you increase in bits you should update your base bet also according to the method.

Dude scripts are allowed they wouldn't be added if the house doesn't make money.

This is betting so it doesn't guarantee results but I normally make goof profit.

Depends how lucky or unlucky you are with Rape Trains

Review:

Quiet possibly the worst eBook I have ever bought in my life. I thought to myself if I brought a \$3 eBook, I wasn't going to make insane money but I put all doubt asides and give it a go. Even if I make \$10 from it, it's profit.

To my surprise, the first screenshot in the eBook shows the OP being 4k bits in negative profit - there is no way a system that can make you decent profit and now people are saying that they've lost everything lol, - that means your paying \$3 for a chance to lose all your money.

Quote: Great script works perfectly but as previously stated you are still gambling I made 40\$ using this script but then kept it going and ending up loosing most of this from my experience there is usually 4 - 5 rape trains a day that I see so starting the bot after one is the best time to make money then stop when you double and start again after the next rape train

Now people are saying it's making them lose all their money LOL. I don't care about profit, what I care about is people being wormy and trying to cheat others. I know this is gambling and you can lose, but this is rubbish.

I politely offered OP a chance to refund my \$3 but he refused, so here is my public review. I would never buy this product again because it adds no value to your experience on bustabit, you would be better off listening to BlackShadow, at least he made like 4BTC profit, which is a lot more than could ever be made from this method. This product imho does not add any advantage, all it does is lure you in, give you some profit and then you lose it all. Blackshadows was at least consistent - read all the reviews here, you're not using any skill or playing the numbers to your side, you literally risk losing all your money in any one go, there is no concrete evidence to prove you have a statistical advantage. You would be better off using Martingale on Bustabit.

So OP - all I really want is my \$3 back because you sold me a eBook that shows you being in a LOT of negative profit - that's rubbish and you know it, you can try and justify it all you want by saying it's gambling, but the truth is your selling crap and you know it.

I'm not trashing shit, get over yourself. It's my review of your product, which is allowed.

I am saying those screenshots you send are ones of when they were not using the script. I went on their profile personally right

now and checked the bets and they were done manually. All except the first person which used the script for the beginning and

not for the end.

Simple question, so please give me an simple answer: Does it beat the house edge? Is it +EV?

Actually I even said don't leave this script on 24/7 as it's risky just like many other scripts. It's not my fault that you would trust your money with gambling and you leave it running overnight without any supervision and you come back to negative profits. The term autopilot in this case is true but as I

previously mentioned, would you trust an autopilot car with your own life and just go to sleep while it drives? If you valued your life I think not, the same goes for your money. I'm guessing the reason why you lost your money is because of rape trains, and this is exactly why I told people to supervise it, if you can predict when a rape starts, you'll lose very little to nothing. Rape trains are guaranteed.

You also seemed to only show the proof of people who got greedy and used another script or manually bet. Take a look at these fellows that also used my script.

They played smart and actually watched over their money unlike you and possibly the others. I can also tell these are using my script for sure as you can see the dips and the recoveries which also have the same multiplier on loss.

You also questioned how I claimed people stopped using my script because it's so "great" it's because they possibly got greedy which I don't blame them for as we all crave money. I know a lot of people who accumulated a lot of bits and went all in and lost it all.

As for the steady income part, it could quote possibly be steady income if done correctly. My friend went from a \$17 deposit to \$200 profit all within a few days. Imagine now if that \$200 was used to make more money, it could easily make \$1,000 in a day. Next Peekaboi also used my script and made nearly 1 BTC in 2 days, I'd say that this is steady income if you watch out for the rape trains and play it right.

What do you have to supervise?

How does this change anything?

Are you just saying: "Well, it's autopilot and working, but it's not my fault if you actually trust it."?

How should I "predict" rape trains?

Isn't that basically the same like saying: "Oh look, I've got a method that can predict the color the roulette ball will fall on" and then showing examples of people for which it has worked and saying the other ones for which it didn't work did it wrong?

He went from \$17 to \$200. We're his odds higher than 8.5% (17/200)?
same question: do you beat the house edge?

From what I've seen it looks like you're taking money for something that loses you money on average. You're showing examples of people who got lucky and blame the people that weren't that it was their fault. If that's wrong, go ahead, proof me otherwise.

Seems fishy. I will contact my lawyer and investor to see if this is a good idea. Probably wont be back considering the scam reports.
