Thread: [\[Questions\] General RAT questions. -- Help please -- New here!](#)

TestTestOMG - March 8, 2016, 3:58 am

Hello Hack Forums!

I'm new here, And i have a few questions.

Q. My jRat is working good, but DarkComet not? Why is that, I opened the port and porteforward. Even when i not open jRat is DarkComet not working.

A. Idk

Q. What is the best RAT?

A. For beginners:

Paid: IDK

Free: IDK

For more advanced:

Paid: IDK

Free: IDK

Q. I have 2,50 euro on my PayPal. Who is the best RAT Mentor for that amount? I want only little explanations.

A. IDK

Can you guys help me with this? The best is if you copy this post and fill the IDK in. ;) So van everybody see the answers in the First/Opening Post.

Make suer your jRat and DarkComet are listening to DIFFERENT ports, that is the issue

If you want a free RAT use DarkComet, if your looking for a paid RAT go with NanoCore!

If you want a free RAT use DarkComet, if your looking for a paid RAT go with NanoCore!

When i delete jRat (Java Rat), DarkComet also not work.

Edit: What is the best Cryptor? Is it APEX Crypter?

A. Make sure the programs are actually LISTENING to the ports, and don't use the same port for different RATS.

Q. What is the best RAT?

A. For beginners:

Paid: Nanocore?

Free: njRat

For more advanced:

Paid: LuminosityLink

Free: Babylon

Q. I have 2,50 euro on my PayPal. Who is the best RAT Mentor for that amount? I want only little explanations.

A. I am willing to give you some free info if you add me on skype, my skype is 'boeitdafzo'

Crypter depends on what RAT you are using.

Cheers.

Edit: What is the best Cryptor? Is it APEX Crypter?

There is no "best" crypter out there. For instance, (Since I don't want to compare other crypters, I'll give an example of mine) Insanity+ Crypter (Freeware) works with DarkComet, NanoCore, Babylon, LL, Babylon and many more other software out there. Have a nice day. ?

TestTestOMG - March 8, 2016, 7:28 am

Thanks for the info guys!
