Thread: [My DJ Career Updated Each Month. Start> 01/02/2016 Updated! 24/03/2018](#)

Nadisty - March 8, 2016, 10:55 am

Hey, so over the years I've kinda fumbled on what I like doing. I used to play in a competitive GB (gamebattles) team, learned to code and became a personal trainer. Now my dream is to be a DJ. I'm not sure where the idea sprung from. Just the thought of making people hyped is a good feeling. Right now I my first upload is 28 days ago. I do eventually want to start using Fruity Loops and stuff to produce my own remixes, but for now I'll just stick with the remixes being stuck together.

Update: Looking back now, it's pretty crazy how far I've gotten. I'm doing some mixes for some big youtube channels, radio stations clubs and producing my own stuff now. This is a big leap forward. Thinking that I only started out with like 477 plays to now over 50k? I want to thank everyone on hackforums for listening to my mixes!

From 01/02/16 I have 477 plays, 61 likes, 6 comments and 7 Reposts. 162 followers with 7 tracks.

If you want to check it out its, <https://soundcloud.com/nadisty>

Do you also think I should start a Youtube?

From 01/02/16 I have 477 plays, 61 likes, 6 comments and 7 Reposts. 162 followers with 7 tracks.

So it is now 26/04/2017 and I have 45k Plays, 2157 Likes, 179 Comments and 454 reposts. 297 Followers with 58 Tracks

It's now 31/05/2017 and I have 48k plays, 2265 Likes, Comments and 501 reposts. 323 Followers with 63 Tracks :)

Update: 01/06/2017 Here's my current stats now. 51k plays, 2442 likes, 246 comments and 606 reposts. 359 Followers with 67 tracks :)

Update: 12/07/2017 My stats are 68.7k Plays, 2697 Likes, 278 Comments and 716 Reposts. Not to mention I now have my own produced songs on Spotify, iTunes etc. Steady progress is being made.

Update: 4/09/2017 70.5k Plays, 2739 Likes, 305 comments and 752 reposts. Still making progress which is great, got some gigs for this month, but for now the goal remains to play at tomorrow land!

Update: I had a bit of inactivity but I'm back on the road now. 24/10/2017, 80.7K plays, 2861 likes, 799 reposts 318 comments.

Update: 02/12/2017, 91.5K plays, 3058 likes, 919 reposts and 369 comments.

Update: 15/02/2018, 98.7k plays, 3228 likes, 967 reposts and 435 comments.

Update:24/03/2018, 100,874 plays, 3362 likes, 1061 reposts and 453 comments.

I'm producing my own tracks and mashups & bootlegs/remixes. Something I thought i'd never be able to do. Always have to keep learning.

I'll also be performing at a gig on 14/04/2018 in the UK!

Nadisty - April 26, 2017, 5:57 am

pretty proud of the results :)

I'm a party DJ, I've fumbled a bit with mixing but not a lot of people like it, they prefer songs they know and I usually get attacked with an extremely long request list

Yui-Senpai - April 26, 2017, 5:59 am

Some nice stuff man, keep it up

I'm going to Ibiza this summer. When are you performing?

SIM-3468354 - April 26, 2017, 6:06 am

Good stuff man!

I've got a set of CDJ400s. Nothing special but it's enough for practicing on and what not. I've got a lot of friends who regularly DJ in the biggest clubs of Melbourne and I can keep the mix going strong when I hang out with them and spin at home. I get pretty anxious in front of people though so I don't play in front of crowds usually.

Yeah this happened to me but you need to build the crowd up, do little events / parties and then move bigger and bigger each time, what genre do you mix? :)

When I spin with my friends most of them have 2000s or 2000NXS so it's pretty good. I mix techno, tech house, minimal, psytrance, Melbourne/kick and bass.

You know I believe in you buddy.

I wish one day I'll be able to perform on a stage playing my own tunes.

Keep the good job up my man! <3

Mustys - April 27, 2017, 4:48 pm

I hope you'll follow your dreams, I got a friend of mine which has been into doing mixes for the last 3 years. He has been playing on a few private parties and getting offers to play at places all the time.

He's 17 although, and waiting for turning 18 to play on clubs, and bars.

Good luck man!

Tell your buddy, good luck!

Hi Roller - April 29, 2017, 10:29 am

Bro I know you didn't get those 45k views and shit completely legit lol I know SoundCloud.

I've dappled in stuff like you said you do, I used to play games hardcore. A few years ago I got FL Studio and a MIDI controller but I couldn't really get into it, so I got a Vestax Typhoon DJ controller and messed with that it was fun tbh.

Now I recently got a Logic Pro X and it blows FL Studio away so I'm trying it again. Good luck with your DJ dreams lol DJs get bitches.

What do you mean I didn't get them legit? It's all the plays on my mixes together?

Where would I get by faking something? If you look at all the threads I've made about promotion and not buying fake Soundcloud plays. But cheers anyways and I prefer Ableton as it's easy to navigate.

Um a variety I guess, hiphop/rnb/dance etc.. a mixture

This is my newest beat, with very rough vocals on it for fun:

<https://soundcloud.com/imaliveagain/cruisingfaster/s-xkU9u>

Gotta re-record and mix/master etc..

And this is an older song featuring my friend Mo (with a bit of me on the stars part lol) more on the dance/chill side: <https://soundcloud.com/imaliveagain/midnight-sun> which could also do with better

vocal mixing/mastering. I'll probably re-release a new fixed version actually.

If you ever need a videographer Hmu.

I've worked with some of the biggest DJ's and Producers in the game now.

Nice I'll give your sc a little listen after I've done some mixing on my track. If you've got any house songs, I'll be happy to include them, or future bass.
