Thread: [\[FUD\] KLog. A free USB keylogger.](#)

Xbowman - March 8, 2016, 1:33 pm

KLog is a new USB keylogger, written by me. It comes with instructions on how to use it, is FUD and it's free!

Just send me a pm asking for the download and I'll send it you. Note: It does NOT install the moment you plug it in! The zip contains instructions as well as .bat files to install, uninstall, get the log to the usb etc.

Enjoy ?

1337 - March 9, 2016, 4:09 pm

can you send it to me ?

thank you

manandson27 - April 7, 2016, 6:00 pm

Hey there,

I'd love a link! I've been trying out a number of free keyloggers, but haven't found anything that works the way I need it to. Most claim to be fully undetectable, but when the rubber meets the road it just doesn't add up!

Thanks!

FuxXER - April 8, 2016, 12:26 pm

Hi Sir!

I'm really interested in this! Can you send me a pm with it?

Thank you a lot!

xSuccess - September 8, 2016, 9:33 am

Sounds good, however screenshots would help you out alot.

Plus just saying, a straight exe works just aswell been as you have to actually run bats.

Unique though, ill give you that.

I don't think its FUD since it was posted 1 year ago. Nonetheless, there are other popular ways to steal using USB (Like stealers instead of keylogger etc) ?

Xbowman - July 19, 2017, 4:45 pm

I sincerely apologize that so many people have been waiting for this extremely long for my keylogger. The reason I made it so you have to pm me is because I wanted it to remain FUD. I did not expect however that so many people would ask me for this for such an extremely long time. Initially I was thinking of sending it out to everyone who asked, until hundreds of people suddenly asked me at the same time. At that point I was basically like "Fuck it, this is way too much for me". I have now given the link to my friend who is now going to rerelease it. However, I am afraid it will not stay fud for very long, but feel free to use it.

Again, I apologize

Perhaps you can combine this with the utilman.exe exploit to gain access to a computer, local install it and have it run every startup, then have a .bat file that extracts the files whenever you have physical access. I would take the files and try and implement this, but unfortunately I'm a mere peasant...

Zynilx - July 29, 2017, 12:38 pm

Are you still releasing this? I saw that you allowed Pronouncer to re-release KLOG but then he said he was no longer managing it and he was letting somebody else re-release.
