I joined HackForums 4 years ago I would have been 13 years old, I started out in the Minecraft greifing section. I was mainly into learning to code in Java to create cracked Minecraft clients. I started making serious money(\$80 a week which was a lot back then) by realising some feature such as chest ESP and X Ray on Minecraft forums and used adfly links but by doing that butt hurt a lot of members who all had a sook back then over it lol. After that I think let for a bit ten came back and I started getting into creating eBooks and selling them or buying other people's eBooks from the auctions section and reselling them. Now I'm a full time shit stirer in the lounge section :D

Aww much love for this section even though it's turn to shit or probably always has been was just too young and dumb to realise.

Did you really get some graphics just to post a short thread that most people don't care for? Also, can I get a shoutout for this post? Either way, nice work.

Edit ([Click to View](#)) Oh and you must be a youngling, you have a pic of a half-naked girl in your profile picture. My apologies for h8ing.

For 4 years on HF, I was expecting a little more than some oversized graphics and poor grammar.
