Thread: [Config Requests! \[SENTRY MBA\]](#)

Conscious - March 11, 2016, 11:05 am

Anyone who has some config requests?

I'm starting to get a bit rusty so I gotta refreshen the memory.

Can someone give me suggestions or requests for configs free of charge of course?

I'll do my best, if I fail so be it!

Regards

Charlie

Spotify, PSN, steam, amazon, and xbox please.

PM me if you could do any of this.

Conscious - March 12, 2016, 11:15 am

Amazon/steam no thanks.

Spotify, PSN, xbox may be an option, but these are considered harder networks in my world and I want something a bit easier for starters, when I am more confident again and back in the field, I'll take a shot at these and you will be the first to know.

Crunchyroll that checks for Guest passes, non proxyless.

Could have the View source in browser to display the page with the guest passes on.

The reason why I say guest passes and not a generic premium member one would be as you need membership to get guest passes, or you would have needed membership within the last X amount of days.

Thanks OP!

I have a Crunchyroll one and I didn't know if this type of service was allowable or not which is why I didn't make one.

These are simply configuration files for a popular software called "Sentry MBA"

These configs are used to bruteforce/steal/crack accounts on a network(The network your config is created for)

Netflix, Reddit, Spotify and whatever network you got a working config for can be cracked.
